Published by WHO, also on behalf of UNICEF, the UNAIDS Secretariat, and Médecins Sans Frontières.

WHO, UNICEF, the UNAIDS Secretariat, and Médecins Sans Frontières have made every effort to ensure the accuracy of price, supplier, and other information presented in this report. Reader's attention is drawn to the introduction, which describes the specific sources and limitations of information provided in this report.

Reader's attention is also drawn to the importance of quality assurance for pharmaceutical products. Licensing authorities in the respective countries of manufacture are expected to be responsible for the review and approval of the detailed composition and formulation when authorizing a pharmaceutical product to be marketed, including the specifications of its ingredients, as submitted by the manufacturer of the dosage form, and to oversee compliance with Good Manufacturing Practice requirements as recommended by WHO.

The data and information contained herein are being provided as is and WHO, UNICEF, the UNAIDS Secretariat, and Médecins Sans Frontières make no representations or warranties, either expressed or implied, as to their accuracy, completeness or fitness for a particular purpose. Neither WHO, UNICEF, the UNAIDS Secretariat, nor Médecins Sans Frontières accepts any responsibility or liability with regard to the reliance on, or use of, such data and information.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO, UNICEF, the UNAIDS Secretariat or Médecins Sans Frontières in preference to others of a similar nature that are not mentioned. Errors or omissions excepted, the names of proprietary products are distinguished by initial capital letters.

The designations employed and the presentation of the material in this report, including tables and maps, do not imply the expression of any opinion whatsoever on the part of WHO, UNICEF, the UNAIDS Secretariat and Médecins Sans Frontières concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

Glossary

AIDS¹ Acquired Immune Deficiency Syndrome – the late stage of HIV disease. AIDS involves the loss of function of the immune system as CD4 cells are infected and destroyed, allowing the body to succumb to opportunistic infections (e.g., Pneumocystis carinii pneumonia, toxoplasmosis) that are generally not pathogenic in people with intact immune systems.

CIF² Cost Insurance and Freight – (...named port of destination) the seller delivers when the goods pass the ship's rail in the port of shipment. The seller must pay the cost of freight if necessary to bring the goods to the named port of destination but the risk of loss or damage to the goods, as well as any additional costs due to events occurring after the time of delivery, are transferred from the seller to the buyer. This term can be used only for sea or inland waterway transport.

COF Consejo General de Colegios Oficiales de Farmacéuticos (General Spanish Council of Pharmacists and Pharmaceutical Associations) – Spanish organization of Pharmaceutical Colleges, which represents all colleges in the national and international forum, develops norms, rules, and professional policy, and acts as the interlocutor with Spanish Ministries.

Diagnostics Laboratory tests used in the diagnosis of infection.

ELISA Enzyme-linked immunosorbent assay – first HIV antibody test which requires a machine to measure color change in test wells.

Endemic¹ The continuous presence of a disease in a geographic location, community or population.

Epidemic¹ An outbreak of a disease within a population. See also pandemic.

EXW² Ex-works – (... named place) the seller's only responsibility is to make the goods available at the seller's premises, i.e., the works or factory. The seller is not responsible for loading the goods on the vehicle provided by the buyer unless otherwise agreed. The buyer bears the full costs and risk involved in bringing the goods from there to the desired destination. Ex works represents the minimum obligation of the seller.

FCA (nearest port)² Free Carrier – (... named place) This term has been designed to meet the requirements of multimodal transport, such as container or roll-on, roll-off traffic by trailers and ferries. It is based on the same name principle as F.O.B. (free on board), except the seller fulfills its obligations when the goods are delivered to the custody of the carrier at the named place. If no precise place can be named at the time of the contract of sale, the parties should refer to the place where the carrier should take the goods into its charge. The risk of loss or damage to the goods is transferred from seller.

FOB² Free-on-board – (... named port of shipment) Under "F.O.B." the goods are placed on board the ship by the seller at a port of shipment named in the sales agreement. The risk of loss or damage to the goods is transferred to the buyer when the goods pass the ship's rail (i.e., off the dock and placed on the ship). The seller pays the cost of loading the goods.

Generic medicine³ The term "generic product" has somewhat different meaning in different jurisdictions. In many technical documents, use of this term is avoided, and the term 'multisource pharmaceutical product' is used instead. In this document, where the term generic medicine is used, it means a pharmaceutical product usually intended to be interchangeable with the innovator product, which is usually manufactured without a license from the innovator company and marketed after expiry of patent or other exclusivity rights where these have previously existed. Generic products may be marketed either under the non-proprietary approved name or under a new brand (proprietary) name. They may sometimes be marketed in dosage forms and/or strengths different from those of the innovator products.

GMP Good Manufacturing Practice

HAART Highly Active Antiretroviral Therapy

HDI Human Development Index

HIV Human Immunodeficiency Virus – a slow-acting retrovirus of the lentivirus family, believed to be the sole or primary cause of AIDS. HIV is transmitted sexually, through blood or vertically (from mother to child). There are 2 known types: HIV-1 and HIV-2.

HIV Test kit There are 3 main types of test for detecting the presence of HIV antibodies: simple/rapid tests, ELISA tests, and confirmatory tests.

International Drug Price Indicator Guide 2003 A joint publication by the World Health Organization and Management Sciences for Health (MSH). Provides a spectrum of prices from non-profit drug suppliers, procurement agencies, and ministries of health, based on their current catalogs or price lists.

ITC International Trade Centre – technical cooperation agency of the United Nations Conference on Trade and Development (UNCTAD) and the World Trade Organization (WTO) for operational, enterprise-oriented aspects of trade development.

¹ AIDS Education Global Information System

² International Chamber of Commerce

³ World Health Organization. *Quality Assurance of Pharmaceuticals. A compendium of guidelines and related materials*. Vol 1, 1997

Manufacturing license Granted by national licensing authorities and gives authorization to manufacture a specific product in a specified manufacturing plant.

MSF Médecins Sans Frontières is an international humanitarian aid organization that provides emergency medical assistance to populations in danger in more than 80 countries, since 1971.

MSH Management Sciences for Health is a private, non-profit educational and scientific organization. Since 1971, MSH has worked with its worldwide partners to improve the management of, and access to, public health services.

MTCT Mother-to-child transmission (of HIV)

Opportunistic infection¹ (OI) An illness caused by a micro-organism that usually does not cause disease in persons with healthy immune systems, but which may cause serious illness when the immune system is suppressed. Common OIs in HIV positive people include Pneumocystis carinii pneumonia (PCP), Mycobacterium avium complex (MAC) and cytomegalovirus (CMV) infection.

Originator [pharmaceutical manufacturers]

Manufacturers that produce mainly innovative medicines

Palliative care⁴ Pain and symptom management, and psycho-social support for persons living with a terminal illness, as well as for their families and caregivers.

Pandemic¹ A widespread disease outbreak affecting the population of an extensive area of the world. See also epidemic.

Patents⁵ A title granted by the public authorities conferring a temporary monopoly for the exploitation of an invention upon the person who reveals it, furnishes a sufficiently clear and full description of it, and claims this monopoly.

PLWA People Living With HIV/AIDS

Protease inhibitor (PI) Type of antiretroviral medicine

Proprietary medicines Medicines that are under patent restrictions belonging to a company, institution, or government.

Reverse transcriptase inhibitor Type of ARV medicine. Can be divided into two classes: Nucleoside Reverse Transcriptase Inhibitor (NRTI) and Non Nucleoside Reverse Transcriptase Inhibitor (NNRTI)

Simple/rapid test Can generally be carried out in 15 minutes and results are read with the naked eye. They are easy to use and require limited training and little or no equipment, making them particularly suitable for use in Voluntary Counselling and Testing (VCT) centres.

The World Bank Group Established in 1944 it is one of the world's largest sources of development assistance.

In Fiscal Year 2003, the institution provided more than US\$18.5 billion in loans to its client countries.

TRIPS⁶ Agreement on Trade Related Aspects of Intellectual Property Rights

UNAIDS The Joint United Nations Programme on HIV/AIDS (UNAIDS) – by the mid-1990s, it became clear that the epidemic's devastating impact on all aspects of human development, were creating an emergency that would require a greatly expanded United Nations effort. UNAIDS created in 1995 was tasked to coordinate this effort.

UNCTAD United Nations Conference on Trade and Development, established in 1964, aims at the development-friendly integration of developing countries into the world economy. It is the focal point within the United Nations for the integrated treatment of trade and development and the interrelated issues in the areas of finance, technology, investment and sustainable development.

UNFPA United Nations Population Fund – began operations in 1969. It is the largest international source of population assistance. About a quarter of all population assistance from donor nations to developing countries is channelled through UNFPA.

UNICEF United Nations Children's Fund – Created by the United Nations General Assembly in 1946 to help children after World War II in Europe. Headquartered in New York, UNICEF carries out its work through eight regional offices and 126 country offices covering more than 160 countries, territories and areas.

WHO World Health Organization – Founded in 1948, the World Health Organization leads the world alliance for Health for All. WHO promotes technical cooperation for health among nations, carries out programmes to control and eradicate disease and strives to improve the quality of human life.

WIPO World Intellectual Property Organization – Founded in 1970, WIPO administers 23 international treaties dealing with different aspects of intellectual property protection.

WTO World Trade Organization – succeeded the General Agreement on Tariffs and Trade (GATT), first signed in 1947 by 23 countries and aimed at protecting and regulating international trade. WTO now has 147 members, three quarters of which are developing or least developed countries.

1. Introduction

1.1 Background

Antiretroviral therapy, prevention and treatment of opportunistic infections and cancers, as well as palliative care are important elements of HIV/AIDS care and support. HIV/AIDS care hence requires a wide range of essential medicines. If available, these effective and often relatively inexpensive medicines can prevent, treat, or help manage HIV/AIDS and most of the common HIV-related diseases.

Less than 8% of people who require antiretroviral (ARV) treatment can access these medicines in developing countries (see Figure 1).

The high price of many of the HIV-related medicines and diagnostics offered by common suppliers – especially antiretroviral and anti-cancer medicines – is one of the main barriers to their availability in developing countries.

There are several other important barriers, including a lack of the basic components required for care, treatment, and support of people living with HIV/AIDS (PLWA) such as: trained staff in health facilities, constant availability of laboratory equipment and supplies, sufficient funding, efficient pharmaceutical services, strong political will and government commitment. Wider availability of information on prices and reliable sources of medicines can help those responsible for procurement make better decisions.

Since 2000, prices of important first-line ARVs have fallen considerably. This trend is attributable to a cumulation of factors including advocacy, corporate responsiveness, competition from generic manufacturers, sustained public pressure, and the growing political attention paid to the AIDS epidemic. In addition, originator companies began announcing discount offers for the benefit of the poorest countries or those where HIV/AIDS prevalence is highest⁷.

Furthermore, the announcement of WHO's "3 by 5" initiative of providing ARV treatment to 3 million PLWA in developing countries by the end of 2005 has lead to anticipation that increased volumes of medicine will be purchased. This may further reduce the prices of certain medicines.

Treating 3 million people by the end of 2005 will require concerted, sustained action by many partners. To chart the direction and to show what WHO itself will be doing to accelerate action, WHO has developed an initial strategic

framework. WHO's 3 by 5 team assembled and refined the framework in intensive consultation with partners. This consultation will continue, and the framework itself will continue to evolve.

WHO's strategic framework for emergency scaling up of antiretroviral therapy contains 14 key strategic elements. These elements fall into five categories – the pillars of the 3 by 5 campaign:

1. Global leadership, strong partnership and advocacy
2. Urgent, sustained country support
3. Simplified, standardized tools for delivering antiretroviral therapy
4. Effective, reliable supply of medicines and diagnostics
5. Rapidly identifying and reapplying new knowledge and successes

The full text of the WHO strategic framework can be found at: <http://webitpreview.who.int/entity/3by5/publications/documents/en/3by5StrategyMakingItHappen.pdf>

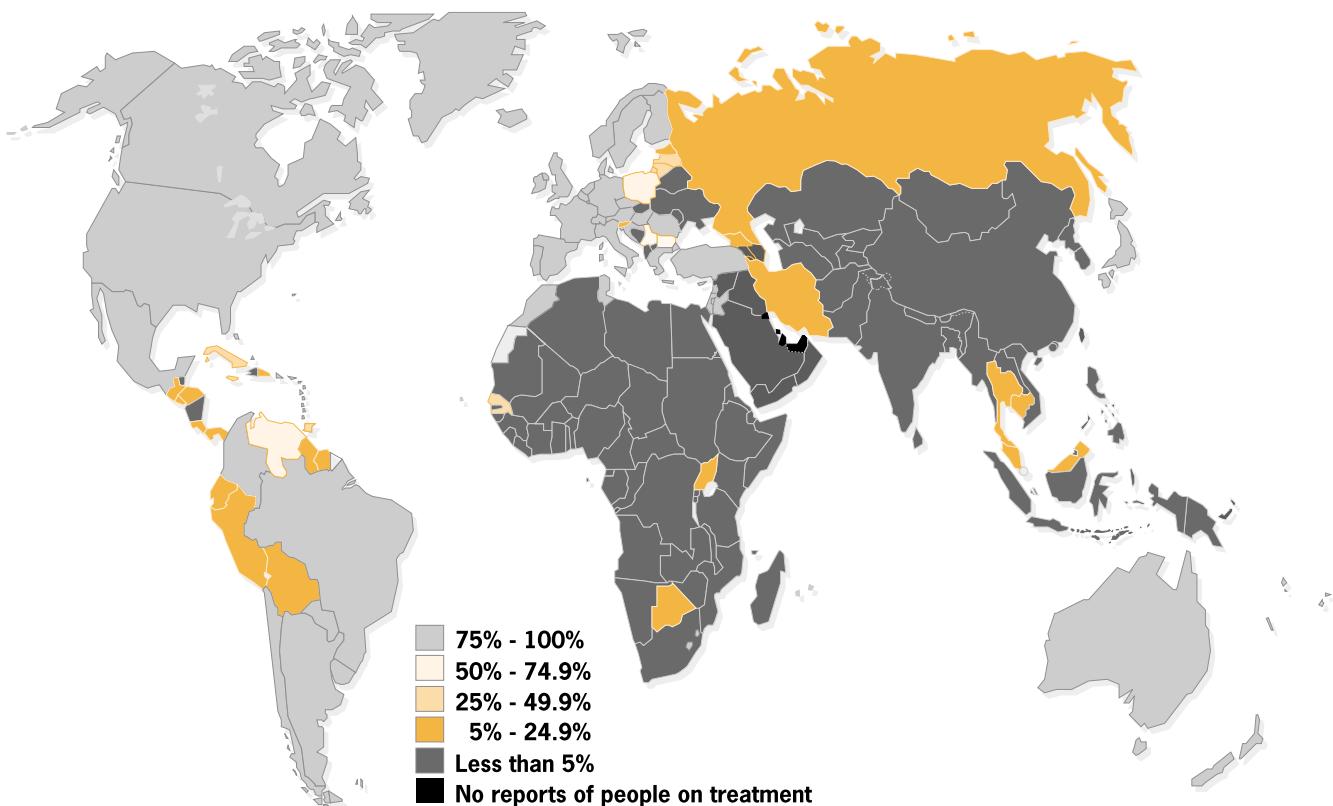

In addition, drug users, PLWA and their advocates from around the world have urged WHO to ensure the inclusion of injecting drug users in the scale-up of ARV therapy in its 3 by 5 initiative (Media Alert dated 19 February 2004).

The new simplified ARV therapy guidelines mentioned in the 3rd pillar also allow for cost savings and real scaling-up activities through the potential use of cheaper fixed-dose combinations (FDCs), where countries are favorable to import generics or where local production facilities exist⁸.

⁷ HIV prevalence status of countries see www.who.int/emc-hiv/fact_sheets/All_countries.html

⁸ More information on fixed dose combinations can be obtained from the MSF briefing note: *Two pills a day saving lives: Fixed-dose combinations (FDCs) of antiretroviral drugs*, MSF, Feb 2004 (see <http://www.accessmed-msf.org/documents/factsheetfdc.pdf>)

Figure 1. Estimated percentage of people covered among those in need of antiretroviral treatment, situation as of November 2003

Source: WHO/UNAIDS. Treating 3 million by 2005 – Making it happen. Geneva, WHO, 2003.

1.2 Aim

This report sets out to provide market information that can be used to help procurement agencies make informed decisions on the sources of medicines and diagnostics, and serve as the basis for negotiating affordable prices. The aim is to help increase access to treatment for PLWA in developing countries.

The data provided by the manufacturers serve to draw attention to the multiplicity of suppliers and the variation in price of some essential HIV/AIDS-related medicines on the international market. Without this information, there is a risk that low-income countries may be paying more than needed to obtain HIV/AIDS-related medicines. Price variations are highlighted through the tables and graphs included.

However, provision of price information addresses only one barrier to access to medicines in countries with limited resources. It should be noted that many other factors will affect the availability of medicines. Some of the other issues that must be considered are health infrastructure, human resources, funding and supply and distribution systems⁹.

1.3 Target audience

This report is intended for use primarily by national procurement agencies in resource-limited countries that lack easily accessible information on reliable sources and prices of medicines and diagnostics.

It may also be useful to others involved in the procurement of medicines and diagnostics, such as not-for-profit organizations, distributors, importers and wholesalers or public health professionals interested in current price levels of medicines and diagnostics for PLWA.

Those who will become involved in planning and implementing HIV/AIDS care and treatment interventions will find important regulatory information in this document.

⁹ Management Sciences for Health and the World Health Organization second edition of *Managing Drug Supply* provides a complete overview as well as step-by-step approaches on how to manage pharmaceutical systems effectively.

1.4 Generating the report

This is the fifth in a series of annual reports commenced in 1999, investigating sources and prices of medicines and diagnostics commonly required by PLWA, but difficult to obtain locally due to a small number of producers, the lack of distribution channels, or high prices. These surveys will be continued and the report will be regularly updated and made available when appropriate.

A survey was carried out from December 2003 through to January 2004. The responses of 84 manufacturers in 29 different countries as well as those participating in the WHO bulk procurement scheme (see Chapter 2) formed the basis of this report. The number of manufacturers reached has greatly increased since the first survey in 1999 as more resources are made available via industry websites and cooperation with other international organizations. Manufacturers that participated in previous surveys, those held in various databases, and those belonging to National Pharmaceutical Associations were contacted for voluntary participation and for completion of a questionnaire.

The UNAIDS Secretariat, UNICEF, MSF, and WHO have worked jointly to conduct a price survey and put together the results into a comprehensive publication, whilst respecting the manufacturers' requests for confidentiality with respect to their individual pricing information.

It must be pointed out that the companies included in this report have been screened only through the completeness of the requested documents they have provided, such as the questionnaire, a National GMP certificate, and associated documents relating to the company and their products. Inclusion in this report does not necessarily constitute prequalification or approval of any sort by UNICEF, WHO, UNAIDS or MSF. Only those products identified in Annex 2B in bold and with an asterisk (*) have (at the time of publication of this document) been approved through the ongoing Pre-qualification Project (see Chapter 3).

Additional companies are sought for future updates of this publication.

1.5 Theme of the report: Diagnostics

Increased access to ARV medicines has also highlighted the need for appropriate and cost-effective HIV/AIDS diagnostic support. Diagnostic technologies are important to monitor the progression of the safety and efficacy of treatment, and the development of resistance.

The existing systems for assessment and procurement of HIV test kits is being expanded to include technologies used to monitor ARV therapy (CD4+ counts and viral load) and drug resistance. An overview of types of CD4+ T-cell

enumeration technologies available are given in Annex 1A whilst information on HIV viral load technologies is given in Annex 1B.

1.6 How to use this report:

1.6.1 Information on prices

Detailed price information is provided in Chapter 4 and in the MSF document included in Annex 5.

Chapter 4 provides prices of medicines and diagnostic tests based on data obtained from the survey. Official UN exchange rates for the month of February 2004 were used to convert local currencies into US dollars. The prices you will find listed in section 4.1 are provided as statistical ranges explained below.

Price ranges and how these prices are distributed indicate what a purchaser should expect to pay when planning procurement. Section 4.2 provides negotiated prices of essential HIV test kits of the UN bulk procurement scheme 2004.

Annex 5 is a contribution from MSF and is the latest version of their bi-annual publication *Untangling the Web of Price Reductions: a pricing guide for the purchase of ARVs for developing countries*.

Most of the prices in this report are ex-works (EXW) or Free Carrier (FCA). They do not include added costs such as freight, insurance, import duties or taxes. For this reason the prices in this report cannot be compared with consumer prices. Many countries continue to impose considerable import duties, tariffs and taxes on the price of essential medicines¹⁰. In addition, wholesale and retail mark-ups vary from one country to another. As a result, the EXW price is often less than half end-price to the consumer.

¹⁰ See Policy and programming options for reducing the procurement costs of essential medicines in developing countries, Levinson, L, Boston University School of Public Health, 2003

The following structure is used for reporting the price information:

(a)	(b)	(c)	(d)
Therapeutic category	Manufacturer	Indicative prices, US\$	List prices, US\$
	Nº of manuf	Nº of countries	unit max min median 25th perc

(a) **Therapeutic category** (according to the WHO Model List of Essential Medicines)

(b) The number of **manufacturers** that provided an indicative price and the number of countries they represent

(c) The **indicative price**

unit

The price quoted relates to the unit described. For example, if the unit is “tablet” the price quoted is for one single tablet.

max

The maximum price listed represents the highest price among products in this category, with no differentiation between originator or generic products.

min

The minimum price listed represents the lowest price among products in this category, with no differentiation between originator or generic products.

median

The median price is the middle price, or where there is an even number of prices listed, it is the mean of the two middle numbers. This means that half the prices quoted are above this median price, and the other half are below it.

25th perc

The 25th percentile is the value point representing the first quartile of quoted prices in ascending order. It is used to give some indication of the dispersion of prices for a given product.

For example, if 4 suppliers were identified as manufacturing *cefixime paediatric oral suspension, 100 mg/5 ml*, and the 25th percentile is US\$ 0.023 per ml of suspension: 1 out of the 4 (a quarter) manufacturers surveyed offer a price equal to or less than US\$ 0.023.

(d) The **List prices** are used to indicate the difference in price, if any, between a developing and a developed country. Brazilian prices are selected as Brazil is a developing country with considerable manufacturing capacity; and Spanish prices because these are generally considered the lowest in Europe.

Brazilian list price

The Brazilian list price included in this report represents the minimum price payable by Brazilian health institutions, between 01/01/2003 and 01/01/2004, for the product and is taken from the Brazilian databank of health purchases (refer to <http://bpoco.saude.gov.br/pls/BPREFD/consulta.inicio>). Where the entry reads “none”, this indicates no purchase has been made for that product, therefore no minimum price payable is available.

Spanish list price

This EXW price has been calculated by applying the new margins (as stated in the Royal Decree 286/2001) to the consumer price as published by The General Spanish Council of Pharmacists and Pharmaceutical Associations. (www.portalfarma.com). It should be noted that Spanish list prices are generally considered the lowest in Europe. In most cases, the indicative prices listed in the report are a fraction of the comparative prices in the Spanish list.

1.6.2 Information on sources

Complete lists of manufacturers, their contact information, and the HIV/AIDS-related medicines and diagnostics they manufacture are given in Chapter 5. Annexes 2A and 2B provide a country by country list of the registration status and sources for each of these medicines.

1.6.3 Selection of medicines and diagnostics

This report includes antiretroviral medicines, medicines used to treat a range of opportunistic infections, medicines for use in palliative care, medicines for the treatment of HIV/AIDS-related cancers and medicines for the management of opioid dependence. It also provides information on a range of test kits available for diagnosis of HIV/AIDS.

The medicines included in the report were selected based on recommendations from available WHO treatment guidelines. The list is not intended to be exhaustive but to broadly cover the most commonly used medicines or medicine categories, in order to ensure that combined with their own resources, purchasing agencies can have at their disposal all medicines and diagnostics required for the comprehensive treatment of HIV/AIDS.

Additional medicines are often provided as they may be helpful due to:

- Greater cost offset by greater safety, e.g. fluconazole instead of ketoconazole;
- Fewer unwanted adverse effects, e.g. alternatives to amitriptyline.

Paediatric formulations have been included wherever possible.

Antiretroviral therapy

Since October 2000, this report has included information on the availability and price range of antiretroviral medicines for use in Highly Active Antiretroviral Therapy. In resource - poor settings, it is critical that these medicines are used in conjunction with WHO treatment guidelines which are intended to support and facilitate the proper management and scale-up of ART in the years to come, by proposing a public health approach to achieve these goals.

The topics addressed in the treatment guidelines include when to start ART, which antiretroviral regimens to start, reasons for changing ART, and what regimens to continue if treatment needs to be changed. They also address how treatment should be monitored, with specific reference to the side effects of ART, and make specific recommendations for certain patient subgroups.

The newly recommended first -line ARV regimens in adults and adolescents consist of a thymidine analog nucleoside reverse transcriptase inhibitor (NRTI) [stavudine (d4T) or zidovudine (ZDV)], a thiacytidine NRTI [lamivudine (3TC)] and a non-nucleoside reverse transcriptase inhibitor (NNRTI) [nevirapine (NVP) or efavirenz (EFV)].

The full text of the treatment guidelines can be found at: http://www.who.int/3by5/publications/documents/arv_guidelines/en/

Antituberculosis medicines

This report does not include data on sources and prices of medicines for first line treatment of tuberculosis (TB) as this information is available on the website of the International Price Indicator Guide 2003¹¹ or of the Global Drug Facility at <http://www.stoptb.org/GDF/drugsupply/drugs.available.html>.

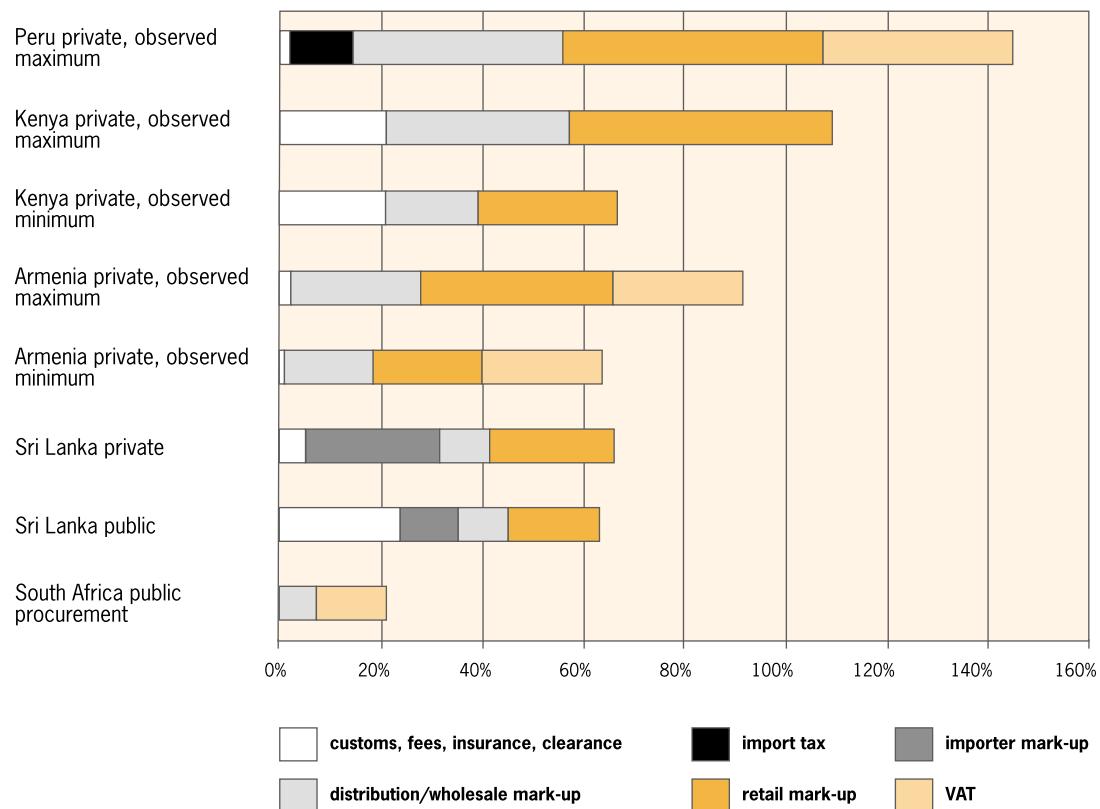

Further resources for information on TB can be found in Annex 3, including links to the DOTS-plus for multidrug resistant TB website and the prequalification of TB medicines.

1.7 Offers of medicine donations and price reductions

Public pressure, advocacy, competition from generic manufacturers and initiatives from pharmaceutical companies have led to reduced prices of some medicines for developing countries. There is no systematic approach to this equitable pricing. Each company determines its own eligibility criteria for countries, sectors and institutions that may benefit from its reduced price. Some companies offer donations of medicines for specific indications such as to prevent mother-to-child transmission of HIV, or to treat certain opportunistic infections affecting PLWAs.

The prices that are quoted in Chapter 4 of this report do not necessarily reflect all agreements that may have been negotiated with individual countries. Information on price offers for ARVs publicly announced by pharmaceutical manufacturers, including information on countries eligible for the offers and other conditions, can be found in the MSF report *Untangling the web of price reductions: a pricing guide for the purchase of ARVs for developing countries* (see Annex 4). Apart from providing prices of ARVs as offered by originator companies and selected generic companies, it highlights the lack of standardization among different companies on eligibility and terms and conditions of price offers. For example, some companies use UNCTAD classification (Least Developed Countries), or the World Bank classification (Low Income/ Middle Income Countries) or a combination of UNDP classification (Human Development Index) and UNAIDS prevalence data.

¹¹ The International Price Indicator Guide 2003 is a joint publication of MSH and WHO. For more information refer to Annex 4, Websites: Drug Prices.

Figure 2. Some examples of taxes and mark-ups as a percentage of the import price.

Source: <http://www.haiweb.org/medicineprices>

1.8 Additional Methods of Cost reduction

In addition to generic competition and advocacy for the reduced pricing in line with the purchasing power of countries, important parallel avenues to be pursued by governments include the active use of compulsory licensing, government use of patents, and parallel importation¹².

As agreed by the Member States of the WTO in 2001, Least developed countries (LDCs) are not obliged to enforce pharmaceutical patents until at least 2016¹³. LDCs should make use or avail themselves of this provision to purchase lowest cost medicines on the world market. For valuable and concise information on this subject, please see the MSF report *Drug patents under the spotlight: Sharing practical knowledge about pharmaceutical patents and HIV/AIDS medicines and related supplies: Contemporary context and procurement*.¹² Alternatively, to obtain further guidance from the appropriate organisation, please fill in the feedback form in Annex 5.

The Global Fund to Fight AIDS, Malaria and Tuberculosis "encourages recipients to comply with national laws and applicable international obligations in the field of intellectual property including the flexibilities provided in the TRIPS

agreement and referred to in the Doha Declaration in a manner that achieves the lowest possible price for products of assured quality."¹⁴

Other measures may include reducing or eliminating import duties and taxes. As data clearly demonstrate, these factors can severely distort the prices patients will pay for medicines compared with the price at which they were sold (see Figure 2). Increasing demand through pooled procurement may also be an option for purchasers to explore.

¹² For further details, refer to the practical guide "HIV/AIDS Medicines and related supplies: Contemporary context and procurement" Chapter 2: Intellectual Property Rights: a Concise Guide. The World Bank, Washington, February 2004.

¹³ Doha Declaration on the TRIPS agreement and Public Health, paragraphs 6 & 7

1.9 Other price information projects

1.9.1 Medicine Prices: a new approach to measurement

Initiated at the WHO–NGO Round Table in 2000, this project has developed technical guidance for a standard approach to the measurement of the prices people pay for key medicines. Availability and retail prices are recorded for a core list of 30 widely used medicines in their originator brand, most-sold and lowest-priced generic versions. Supplementary lists with different medicines can be tailored to meet local needs using the same method.

Price information is collected at a sample set of pharmacies in public, private and one other sector which can be defined to fit local conditions (eg. NGO agencies, religious missions or other charity services, or other types of not-for profit service providers). The method uses median prices provided by Management Sciences for Health (MSH) for the core medicines as a benchmark and the spreadsheet (CD-ROM included) calculates price ratios for each medicine to the MSH “reference” price.

The principal add-ons or “price components” between the manufacturer sales price and retail price are estimated for selected medicines, and treatment affordability is calculated for ten common conditions, relative to the daily wage of the lowest paid government worker. The concept of affordability is especially important, because it allows to evaluate “access” by referring to the actual income of the individual, according to a patient-focused approach.

A manual and accompanying spreadsheet on CD-ROM are freely available in English, French and Spanish on the web sites of both WHO: <http://www.who.int/medicines/library/prices.shtml> and Health Action International: <http://www.haiweb.org/medicineprices/>

Arabic and Russian versions will be produced in the course of 2004.

The HAI website also contains an open-access repository of data from studies undertaken so far, and a synthesis of results from the nine pilot studies.

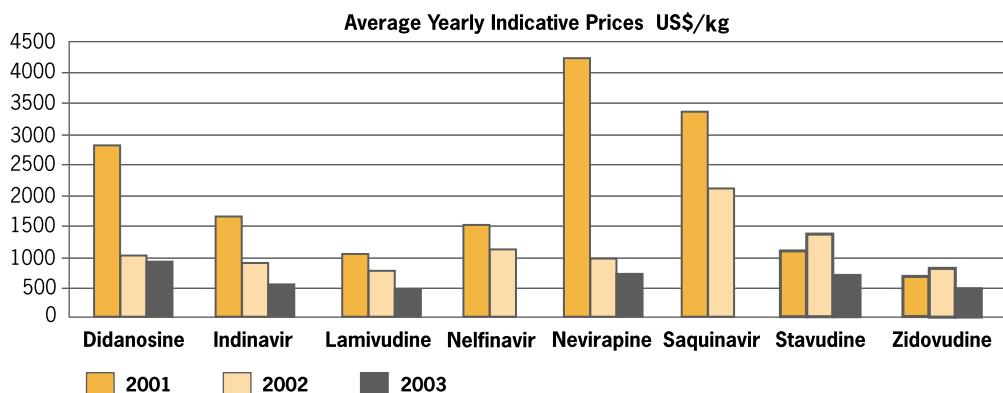

1.9.2 Price monitoring of pharmaceutical starting materials

With today's immense flow of information, finding the right source for unbiased, accurate and timely market intelligence can be difficult, costly and time-consuming. Identifying the right source of information is the first step toward maximizing international business opportunities. The Market News Service (MNS) of the UNCTAD/International Trade Centre (ITC) strives to fill this need by providing detailed price and market information on selected primary and semi-processed products of particular interest to developing countries and economies in transition, including a monthly report on Pharmaceutical Starting Materials of Essential Drugs.

The Market News Service (MNS) for Pharmaceutical Starting Materials was established in 1992 in collaboration with the Essential Drugs and Medicine Policy (EDM) of the World Health Organization (WHO) to issue a monthly report providing up-to-date prices and supporting commercial data on pharmaceutical starting materials used in the production of essential medicines. The report of December 2003 listed 303 active pharmaceutical ingredients. The report is an information source with the sole aim of improving market transparency and encouraging price and quality competition for the benefit of all market players. It covers the main trading centres in Europe and Asia and draws information from a network of price information providers.

The prices of active pharmaceutical ingredients used in manufacturing antiretrovirals have been significantly reduced during the last two years as shown in the graph below.

Figure 3. Price trends of various active pharmaceutical ingredients used in manufacturing antiretroviral medicines.

As part of its effort to provide information to improve market transparency, MNS reports are now directly available on-line through ITC's latest market analysis tool, Product Map, www.p-maps.org, a subscription based service. Subscribers from least developed countries and WHO Regional Offices receive printed copies free-of-charge. The

Product Map on Pharmaceuticals combines quantitative market information in relation to international trade statistics and macroeconomic indicators, qualitative market intelligence - such as market briefs and published market studies - and networking links to key market players in the pharmaceuticals industry.

2. Diagnostics

ARVs have to be used with appropriate and cost-effective diagnostics. Diagnostic technologies are important to monitor the progression of the disease, the safety and efficacy of the treatment and the development of resistance.

Since 1988, WHO has provided objective assessments of commercially available HIV test kits. This ongoing evaluation programme is coordinated by the WHO Department of Essential Health Technologies in collaboration with the UNAIDS Secretariat.

In 1989, WHO established a HIV test kit bulk-procurement scheme, which is now operated in collaboration with other UN agencies. The aim is to provide national AIDS programmes, blood transfusion services, large hospitals, non-governmental organizations, reference laboratories, UN agencies, donor-supported AIDS projects, and regulatory authorities in developing countries with high quality tests at reasonable cost. All HIV tests available through the scheme have been successfully evaluated by the WHO evaluation programme and meet specific, rigorous criteria. Manufacturers of test kits that have met the criteria are invited to make their quotations in a selective tender process. In addition to the assay performance other aspects such as production capacity, distribution and service networks, patent issues, shelf life and storage conditions, are considered. This process has enabled the UN agencies to offer high quality tests at reduced prices, resulting in considerable annual savings to countries.

The test kits listed in chapter 4 are reviewed annually and cover the three broad categories, including simple/rapid tests, ELISA tests and supplemental tests.

The demand for simple/rapid HIV tests has increased and a wide range of high quality simple/rapid tests are available. These are easy-to-use tests that require little or no equipment and limited training to perform and can provide accurate same-day results. This makes them particularly suitable for use in voluntary counselling and testing (VCT) centres and in antenatal clinics for prevention of mother to child transmission of HIV. When initial tests are reactive for HIV, confirmation of the test results is needed to rule out any false positive results.

The existing systems for assessment and procurement of HIV test kits are being expanded to include technologies used to monitor ARV therapy (CD4+ counts and viral load) and drug resistance.

An overview of types of CD4+ T-cell enumeration technologies available are given in Annex 1A, whilst information on HIV viral load technologies is given in Annex 1B. Please note that this information is regularly updated and available at: http://www.who.int/eht/Main_areas_of_work/BTS/HIV_Diagnostics/HIV_Test_Kit_Evaluation.htm#Reports

Additional documents with relevant information related to diagnostics are listed in Annex 3.

3. Access to quality HIV/AIDS medicines

3.1 Prequalification project

The Procurement, Quality and Sourcing Project was initiated by WHO in collaboration with other United Nations Organizations (UNAIDS Secretariat, UNICEF, and UNFPA, supported by the World Bank) in March 2001, as part of a UN-wide strategy to improve access to HIV-related treatment.

This project evaluates pharmaceutical products according to WHO recommended standards of safety, efficacy and quality and compliance with good manufacturing practices (GMP). The prequalification process follows a standard procedure developed through WHO's Expert Committee on Specifications for Pharmaceutical Preparations. Assessment of product dossiers submitted by companies and GMP inspections are followed promptly by feedback to the companies concerned. A medicine is added to the list of prequalified products only when the products and manufacturing sites meet the required standards. A list of HIV-related products/manufacturers that have been found acceptable, in principle, for procurement by UN agencies is available on the web sites of collaborating UN agencies.

As of January 2004, 265 product dossiers for various products and dosage forms from over 40 manufacturers were received: 95 of these products, from 26 manufacturing sites have been fully reviewed and listed as prequalified products. The remaining products are currently under review. The products evaluated are ARVs (including fixed dose combinations), and medicines for the treatment of opportunistic infections and cancers. A list of products evaluated under this project is regularly updated through the websites of collaborating UN agencies. Interested readers are advised to consult these sites for the latest versions, or to access the list via the WHO website: <http://mednet3.who.int/prequal/>.

This report is a pricing service, not a prequalification service. Every effort has been made to ensure the accuracy of the price information presented here and screening of the products included in this survey has been carried out as indicated on page 3. However, this screening in no way constitutes an in depth review of product quality. Products that have been prequalified are marked in Annex 2B

of this report in bold and with an asterisk (*). Other products listed in this document should, in relation to purchase, be subject to prequalification review as indicated in the WHO General Procedure for Prequalification of Suppliers of Pharmaceutical Products. Manufacturers are encouraged to apply for WHO prequalification for their HIV-related products.

In scaling up access to ARVs, it is not only the quantity of medicines that is important, but also their quality. The Prequalification Project will guide potential buyers or procurement agencies by providing them with a current, reliable and standardised inventory to select from when purchasing these life-saving medicines.

3.2 Product registration

In order to guide procurement, governments must ensure they have strong national drug regulatory authorities (DRAs) with a clear mandate and legal authority, appropriate organizational structure, adequate number of qualified staff, sufficient resources and a sustainable financing mechanism.

The primary objective of DRAs is to safeguard public health by ensuring that all medicines circulating in the markets meet appropriate standards of safety, quality and efficacy. Safety aspects cover potential or actual harmful effects; quality relates to development and manufacture; and efficacy is a measure of the beneficial effect of the medicine on patients.

To assist procurement agencies with regulatory aspects of medicine importation and procurement, Annex 2A provides information on countries in which the majority of products listed in this report are currently registered. This information is provided by manufacturing companies and is subject to change.

To improve the accuracy of this publication, DRAs are strongly encouraged to submit any known changes or corrections to the data provided, either by email to supply@unicef.org; or by fax to UNICEF Supply Division in Copenhagen, Denmark +45 35269421.

ANNEX 1A

CD4+ T-cell enumeration technologies

Dedicated and manual assays

	Dedicated Technology	CyFlow Counter	Cyto-Spheres	Manual Assays
Manufacturer	Beckton Dickinson (CA, USA)	Partec GmbH (Munster, Germany)	Coulter Corporation (FL, USA)	Dynal AS (Oslo, Norway)
Instrumentation	Dedicated CD4 counter	Dedicated CD4 counter	Haemocytometer/light microscope	Magnethaemocytometer/light or fluorescence microscope
Assay principle	Flow cytometry	Flow cytometry	Direct observation of bead-rosetted cells	Direct observation of immunocaptured cells
Detection system	Fluorochrome labelled anti-CD3, CD4 and CD8 MAb	Fluorochrome labelled anti-CD4 MAb	Latex beads conjugated to anti-CD4 MAb	Magnetic beads conjugated to anti-CD4 and CD8 MAb
Specimen	Whole blood	Whole blood	Whole blood	Whole blood
Results	Absolute CD4 count Absolute CD8 count CD4/CD8 ratio CD4% and CD8% among T cells	Absolute CD4 count	Absolute CD4 count	Absolute CD4 count Absolute CD8 count CD4/CD8 ratio
Correlation with flow cytometry ^a (r value)	0.93 – 0.98 (several international studies)	not available	0.67 – 0.93 (several international studies)	0.94 and 0.96 (several international studies)
Cost of instrument (US\$)	8 000	20 000	2000	2000 – 10 000 ^b
Cost of reagents/test (US\$) ^c	6 – 20	2	4 – 8	3 – 5
Advantages	Automated, fewer steps, less human error, low bio-hazard risk, Absolute CD4 and CD8 counts, Quick results, EQA available	Reagents available at low cost, Quick results, EQA available	Simple and rapid	Simple and rapid Absolute CD4 and CD8 counts
Disadvantages	Expensive reagents, 12 samples processed at a time, CD4% among lymphocytes not reported	CD4% among lymphocytes not reported, Instrument not proven in an independent multicentre study	10 samples processed at a time, Subjectivity in visual counting, CD4% among lymphocytes or CD8 counts not reported. No EQA available	6 samples processed at a time, Subjectivity in visual counting, CD4% among lymphocytes or CD8 counts not reported. No EQA available

MAb – monoclonal antibody; EQA – external quality assessment

^a The analysis of correlation using linear regression is not appropriate to study method comparison. Instead, the analysis of agreement should be performed. Unfortunately, none of the published studies has used this analysis to compare these methods with flow cytometry. Therefore, here the r values are still reported. ^b Depending on if a light or fluorescence microscope is used.

^c Reagent cost may decrease substantially in the near future.

Flow cytometry

Parameter	Double-platform ^a	Volumetric ^b	Single-platform	Bead-based ^c
Instruments, Manufacturers	Flow cytometer Partec GmbH (Munster, Germany) ^d Becton Dickinson (CA, USA) Coulter Corporation (FL, USA)	Flow cytometer Partec GmbH (Munster, Germany) ^d Guava Technologies (CA, USA)	Flow cytometer Becton Dickinson (CA, USA) Coulter Corporation (FL, USA)	
Cost of instrument (US\$)	20 000 – 95 000	20 000 – 70 000	20 000 – 95 000	
Cost of reagents/test (US\$)	3 – 11	2 – 10	8 – 25	
Specimen	Whole blood	Whole blood	Whole blood	
Results	Absolute CD4 count Absolute CD8 count CD4% and CD8% among lymphocytes CD4/CD8 ratio B and NK cells are possible	Absolute CD4 count Absolute CD8 count CD4% and CD8% among lymphocytes CD4/CD8 ratio B and NK cells are possible	Absolute CD4 count Absolute CD8 count CD4% and CD8% among lymphocytes CD4/CD8 ratio B and NK cells are possible	
Throughput (samples/day)	Up to 200	Up to 50	Up to 200	
Advantages	Accurate pipetting less crucial One tube assay possible without QC problems EQA available	No need for extra beads or haematology analyser or haematology analyser EQA available	No need for haematology analyser Protocols for aged samples available EQA available	
Disadvantages	Requires the use of a haematology analyser More prone to clerical errors Fresh samples needed in order to obtain absolute counts	Requires accurate pipetting technique Internal QC for pipetting requires two tubes assay Instruments not yet proven in an independent multi centre study	Requires accurate pipetting technique Internal QC for pipetting requires two tubes assay Beads are expensive and require careful handling	

B and NK cells – subsets of lymphocytes; QC – quality control; EQA – external quality assessment

^a Any flow cytometer from any of the three manufacturers can operate with this method to provide absolute counts. The results of flow cytometry are combined with those from haematology to calculate absolute counts.

^b Volumetric instruments have the inherent hardware property of measuring the volume of the sample, providing direct absolute counts without the use of haematology analysers or beads.

^c Any flow cytometer from any of the three manufacturers can operate with this method to provide absolute counts.

^d Instruments from this manufacturer, including the CyFlow, remain to be validated as volumetric absolute CD4 T cell counters by independent investigators in multicentric studies.

ANNEX 1B

Summary of main characteristics of Viral Load Technologies

(nucleic acid based)

Company	Abbott	Roche	Bayer	bioMérieux	bioMérieux	Prímagén
Assay Name	Lx® HIV RNA Quantitative	Amplicor HIV-1 Monitor® Test	Versant® HIV-1 RNA 3.0 Assay	NucliSens® HIV-1 QT	NucliSens EasyQ® HIV-1	Retina™ Rainbow
Type of assay	RT-PCR	RT-PCR	bDNA	NASBA	NASBA	NASBA

ANNEX 2A

Registration status of products included in the sources and prices survey

If the products you require are not listed as registered in your country, this does not mean they cannot be purchased. Please contact the manufacturer to find out if they are able to supply to your country, and contact your Drug Regulatory Authority for quality assurance and importation issues. It is also advisable to check if products of interest have been authorised for marketing in countries that have a strong regulatory system such as the United Kingdom or South Africa.

Country/ Medicine Name (INN)	Dosage form & strength	Manufacturer	Registration status
Afghanistan			
benzylpenicillin	powder for injection, 3 g (=5 million IU) (as sodium or potassium salt) in vial	Alembic Ltd.	Completed
cefixime	paediatric oral suspension, 100 mg/5 ml	Bilim Pharmaceutical Ind.	Completed
ceftriaxone	powder for injection, 1 g (as sodium salt) in vial	Bilim Pharmaceutical Ind.	Completed
clarithromycin	tablet, 250 mg	Bilim Pharmaceutical Ind.	Completed
gentamicin	injection, 40 mg (as sulfate) in 2-ml vial	Neon Laboratories Ltd.	Completed
nelfinavir (NFV)	capsule, 250 mg	F. Hoffmann-La Roche Ltd.	Completed
procaine benzylpenicillin	powder for injection, 3 g (=3 million IU) in vial	Alembic Ltd.	Completed
saquinavir (SQV)	capsule, 200 mg	F. Hoffmann-La Roche Ltd.	Completed
sulfamethoxazole+trimethoprim	tablet, 400+80 mg	IPCA Laboratories Ltd.	Completed
Albania			
aciclovir	cream, 5%	Ecobi Farmaceutici S.a.s	Completed
amitriptyline	tablet, 25 mg (as hydrochloride)	Remedica Ltd.	Completed
benzathine benzylpenicillin	powder for injection, 1.44 g (=2.4 million IU) in 5-ml vial	Alembic Ltd.	Completed
calcium folinate (leucovorin)	tablet, 15 mg	Ecobi Farmaceutici S.a.s.	Completed
chloramphenicol	powder for injection, 1 g (sodium succinate) in vial	Sanavita Aktiengesellschaft & Co.	Completed
ciprofloxacin	tablet, 250 mg (as hydrochloride)	Alembic Ltd.	Completed
clotrimazole	cream, 1%	Purna Pharmaceuticals NV	Completed
ketoconazole	tablet, 200 mg	Remedica Ltd.	Completed
methotrexate	tablet, 2.5 mg	Remedica Ltd.	Completed
miconazole	cream/ointment 2% (as nitrate) 30 g tube	Ecobi Farmaceutici S.a.s.	Completed
sulfamethoxazole+trimethoprim	oral suspension, 200+40 mg/5 ml	Ecobi Farmaceutici S.a.s.	Completed
zidovudine (AZT or ZDV)	capsule, 250 mg	Glaxo SmithKline	Completed
Algeria			
aciclovir	cream, 5%	Ecobi Farmaceutici S.a.s.	Completed
azithromycin	tablet/capsule, 250 mg (dihydrate)	Aleppo Pharmaceutical Industries (Alpha)	Completed
bleomycin	powder for injection, 15 mg (as sulfate) in vial	Aventis Intercontinental	Completed
cefixime	paediatric oral suspension, 40 mg/5 ml	Aventis Intercontinental	Completed
ceftriaxone	powder for injection, 250 mg (as sodium salt) in vial	Aleppo Pharmaceutical Industries (Alpha)	Completed

SOURCES AND PRICES OF SELECTED DRUGS AND DIAGNOSTICS FOR PEOPLE LIVING WITH HIV/AIDS

Country/ Medicine Name (INN)	Dosage form & strength	Manufacturer	Registration status
Algeria			
ciprofloxacin	tablet, 500 mg (as hydrochloride)	Aleppo Pharmaceutical Industries (Alpha)	Completed
indinavir (IDV)	capsule, 400 mg	Cipla Ltd.	Completed
ketoconazole	tablet, 200 mg	Intas Pharmaceuticals Ltd	Completed
lamivudine (3TC)	syrup, 50 mg/5 ml	Cipla Ltd.	Completed
methotrexate	powder for injection, 50 mg (as sodium salt) in 2-ml vial	Aventis Intercontinental	Completed
methotrimepazine/ levomepromazine	tablet, 25 mg	Aventis Intercontinental	Completed
metronidazole	injection, 500 mg in 100-ml vial	Aventis Intercontinental	Completed
miconazole	cream/ointment 2% (as nitrate) 30 g tube	Ecobi Farmaceutici S.a.s.	Completed
ofloxacin	tablet, 200 mg	Aventis Intercontinental	Completed
omeprazole	capsule, 20 mg	Mepha Ltd	Completed
sulfamethoxazole+trimethoprim	oral suspension, 200+40 mg/5 ml	Aspen Pharmacare	Completed
zidovudine (AZT or ZDV)	injection, 10 mg/ml in 20-ml vial	Glaxo SmithKline	Completed
Angola			
nelfinavir (NFV)	capsule, 250 mg	F. Hoffmann-La Roche Ltd.	Completed
saquinavir (SQV)	capsule, 200 mg	F. Hoffmann-La Roche Ltd.	Completed
Argentina			
3TC/AZT	tablet, 300/150 mg	Donato y Zurlo S.A.	Completed
abacavir (ABC)	syrup, 20 mg/ml	Glaxo SmithKline	Completed
ABC/3TC/ZDV	tablet, 300/150/300 mg	Glaxo SmithKline	Completed
aciclovir	powder for injection, 250 mg (as sodium salt) in 10-ml vial	Lab. Filaxis International S.A.	Completed
calcium folinate (leucovorin)	tablet, 15 mg	Lab. Filaxis International S.A.	Completed
ciprofloxacin	tablet, 250 mg (as hydrochloride)	Bayer Healthcare AG	Completed
didanosine (ddl)	buffered chewable tablet, 100 mg	Donato y Zurlo S.A.	Completed
doxorubicine HCl	powder for injection, 10 mg in 5-ml vial	Lab. Filaxis International S.A.	Completed
efavirenz (EFZ)	capsule, 200 mg	Lab. Filaxis International S.A.	Completed
etoposide	injection, 20 mg/ml in 5-ml ampoule	Lab. Filaxis International S.A.	Completed
ganciclovir	powder for IV infusion, 500 mg in vial	Lab. Filaxis International S.A.	Completed
indinavir (IDV)	capsule, 200 mg	Donato y Zurlo S.A.	Completed
lamivudine (3TC)	syrup, 50 mg/5 ml	Donato y Zurlo S.A.	Completed
methotrexate	powder for injection, 50 mg (as sodium salt) in 2-ml vial	Aventis Intercontinental	Completed
methotrimepazine/ levomepromazine	tablet, 25 mg	Aventis Intercontinental	Completed
metronidazole	injection, 500 mg in 100-ml vial	Aventis Intercontinental	Completed
nelfinavir (NFV)	capsule, 250 mg	Donato y Zurlo S.A.	Completed
nevirapine (NVP)	syrup, 50 mg/5 ml	Boehringer Ingelheim Gmbh	Completed

azithromycin	oral suspension, 200 mg/5 ml (dihydrate)	Aleppo Pharmaceutical Industries (Alpha)	Completed
ceftriaxone	powder for injection, 1 g (as sodium salt) in vial	Aleppo Pharmaceutical Industries (Alpha)	Completed
ciprofloxacin	tablet, 250 mg (as hydrochloride)	Aleppo Pharmaceutical Industries (Alpha)	Completed
clarithromycin	tablet, 250 mg	Bilim Pharmaceutical Ind.	Completed
clindamycin	capsule, 150 mg	Shiba Pharmaceuticals & Chemicals Ltd.	Completed
doxycycline	capsule/tablet, 100 mg (hydrochloride)	Shiba Pharmaceuticals & Chemicals Ltd.	Completed

ANNEX 2A. REGISTRATION STATUS OF PRODUCTS INCLUDED IN THE SOURCES AND PRICES SURVEY

Country/ Medicine Name (INN)	Dosage form & strength	Manufacturer	Registration status
Yemen			
erythromycin (as stearate or ethylsuccinate)	powder for oral suspension, 125 mg	Hovid SDN. BHN.	Completed
fluconazole	capsule, 150 mg	Cipla Ltd.	Completed
ketoconazole	tablet, 200 mg	Bilim Pharmaceutical Ind.	Completed
metoclopramide	tablet, 10 mg (as hydrochloride)	IPCA Laboratories Ltd.	Completed
miconazole	cream/ointment 2% (as nitrate) 15 g tube	Lachifarma, SRL	Completed
naltrexone HCl	tablet, 50 mg	Lachifarma, SRL	Completed
nelfinavir (NFV)	capsule, 250 mg	F. Hoffmann-La Roche Ltd.	Completed
nevirapine (NVP)	syrup, 50 mg/5 ml	Boehringer Ingelheim GmbH	Completed
nevirapine (NVP)	tablet, 200 mg	Boehringer Ingelheim GmbH	Completed
ofloxacin	tablet, 200 mg	Hovid SDN. BHN.	Completed
omeprazole	capsule, 10 mg	Alembic Ltd.	Completed
procyclidoperazine	tablet, 5 mg	Remedica Ltd.	Completed
pyrimethamine	tablet, 25 mg	Shiba Pharmaceuticals & Chemicals Ltd.	Completed
saquinavir (SQV)	capsule, 200 mg	F. Hoffmann-La Roche Ltd.	Completed
sulfamethoxazole+trimethoprim	oral suspension, 200+40 mg/5 ml	Aurobindo Pharma Ltd.	Completed
vincristine	injection, 1 mg/ml (sulfate) in vial	Cipla Ltd.	Completed
Zambia			
3TC/AZT	tablet, 300/150 mg	Glaxo SmithKline	Completed
abacavir (ABC)	tablet, 300 mg	Glaxo SmithKline	Completed
ciprofloxacin	tablet, 250 mg (as hydrochloride)	Aurobindo Pharma Ltd.	Completed
erythromycin	tablet/capsule, 250 mg (as stearate or ethylsuccinate)	Alembic Ltd.	Completed
indinavir (IDV)	capsule, 400 mg	Ranbaxy Laboratories Ltd	Completed
ketoconazole	tablet, 200 mg	Hovid SDN. BHN.	Completed
lamivudine (3TC)	tablet, 150 mg	Ranbaxy Laboratories Ltd	Completed
miconazole	cream/ointment 2% (as nitrate) 15 g tube	Hovid SDN. BHN.	Completed
nelfinavir (NFV)	capsule, 250 mg	F. Hoffmann-La Roche Ltd.	Completed
nevirapine (NVP)	syrup, 50 mg/5 ml	Boehringer Ingelheim GmbH	Completed
nevirapine (NVP)	tablet, 200 mg	Boehringer Ingelheim GmbH	Completed
nevirapine (NVP)	tablet, 200 mg	Ranbaxy Laboratories Ltd	Completed
omeprazole	capsule, 20 mg	Aurobindo Pharma Ltd.	Completed
saquinavir (SQV)	capsule, 200 mg	F. Hoffmann-La Roche Ltd.	Completed
stavudine (d4T)	capsule, 30 mg	Ranbaxy Laboratories Ltd	Completed
sulfamethoxazole+trimethoprim	tablet, 400+80 mg	Aurobindo Pharma Ltd.	Completed
zidovudine (AZT or ZDV)	capsule, 100 mg	Cipla Ltd.	Completed
Zimbabwe			
3TC/AZT	tablet, 300/150 mg	Glaxo SmithKline	Completed
abacavir (ABC)	syrup, 20 mg/ml	Glaxo SmithKline	Completed
ABC/3TC/ZDV	tablet, 300/150/300 mg	Glaxo SmithKline	Completed
aciclovir	tablet, 400 mg	Remedica Ltd.	Completed
albendazole	chewable tablet, 400 mg	IPCA Laboratories Ltd.	Completed
benzathine benzylpenicillin	powder for injection, 1.44 g (=2.4 million IU) in 5-ml vial	Alembic Ltd.	Completed

SOURCES AND PRICES OF SELECTED DRUGS AND DIAGNOSTICS FOR PEOPLE LIVING WITH HIV/AIDS

Country/ Medicine Name (INN)	Dosage form & strength	Manufacturer	Registration status
Zimbabwe			
benzylpenicillin	powder for injection, 3 g (=5 million IU) (as sodium or potassium salt) in vial	Alembic Ltd.	Completed
ceftriaxone	powder for injection, 1 g (as sodium salt) in vial	Ranbaxy Laboratories Ltd	Completed
ciprofloxacin	tablet, 250 mg (as hydrochloride)	Bayer Healthcare AG	Completed
doxycycline	capsule/tablet, 100 mg (hydrochloride)	Intas Pharmaceuticals Ltd	Completed
fluconazole	capsule, 200 mg	IPCA Laboratories Ltd.	Completed
fluoxetine	capsule, 20 mg	Ranbaxy Laboratories Ltd	Completed
gentamicin	injection, 40 mg (as sulfate) in 2-ml vial	Intas Pharmaceuticals Ltd	Completed
lamivudine (3TC)	tablet, 150 mg	IPCA Laboratories Ltd.	Completed
metoclopramide	injection 5 mg/ml in 2-ml ampoule	Aspen Pharmacare	Completed
metronidazole	injection, 500 mg in 100-ml vial	Aspen Pharmacare	Completed
nelfinavir (NFV)	capsule, 250 mg	F. Hoffmann-La Roche Ltd.	Completed
nevirapine (NVP)	syrup, 50 mg/5 ml	Boehringer Ingelheim GmbH	Completed
nevirapine (NVP)	tablet, 200 mg	Boehringer Ingelheim GmbH	Completed
nevirapine (NVP)	tablet, 200 mg	Ranbaxy Laboratories Ltd	Completed
ofloxacin	tablet, 200 mg	Remedica Ltd.	Completed
pethidine	injection, 50 mg/ml (hydrochloride) in 1-ml ampoule	Aspen Pharmacare	Completed
saquinavir (SQV)	capsule, 200 mg	F. Hoffmann-La Roche Ltd.	Completed
sulfamethoxazole+trimethoprim	tablet, 400+80 mg	Aspen Pharmacare	Completed
zidovudine (AZT or ZDV)	capsule, 100 mg	Glaxo SmithKline	Completed

ANNEX 2B

Sources of medicines

Prequalified¹⁶ sources of specific products are marked in bold with an asterisk

Table 1. Anti-infective medicines

Anthelmintics	Manufacturer
albendazole	
chewable tablet, 400 mg	Artesan Pharma GmbH & Co. KG, Beltapharm SpA, Cipla Ltd., Gracure Pharmaceuticals Ltd., IPCA Laboratories Ltd., Lachifarma SRL, Lyka Labs Ltd., Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd., Strides Arcolab Ltd.
Antibacterials, beta lactam medicines	
benzathine benzylpenicillin	
powder for injection, 1.44 g (=2.4 million IU) in 24-ml vial	Sanavita Aktiengesellschaft & Co.
powder for injection, 1.44 g (=2.4 million IU) in 5-ml vial	Alembic Ltd., Aventis Intercontinental, Pharmchem International Ltd.
benzylpenicillin	
powder for injection, 3 g (=5 million IU) (as sodium or potassium salt) in vial	Alembic Ltd., Pharmchem International Ltd., Sanavita Aktiengesellschaft & Co.
powder for injection, 600 mg (=1 million IU) (as potassium salt) in vial	Pliva d.d.
cefixime	
paediatric oral suspension, 100 mg/5 ml	Aventis Intercontinental, Bilim Pharmaceutical Ind., Lyka Labs Ltd.
paediatric oral suspension, 40 mg/5 ml	Aventis Intercontinental
tablet, 200 mg	Aventis Intercontinental, Cipla Ltd., Lyka Labs Ltd.
tablet, 400 mg	Bilim Pharmaceutical Ind., Genepharm SA
ceftriaxone	
powder for injection, 1 g (as sodium salt) in vial	Alembic Ltd., Aurobindo Pharma Ltd., Aventis Ltd., Bilim Pharmaceutical Ind., Cheil Jedang Corp., Cipla Ltd., Demo S.A., Pharmaceutical Industry, IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Laboratorio Reig Jofre S.A., Lyka Labs Ltd., Mepha Ltd., Neon Laboratories Ltd., Panpharma, Pharmchem International Ltd., Pliva d.d., Ranbaxy Laboratories Ltd., Rekah Pharmaceutical Group, Strides Arcolab Ltd.
powder for injection, 250 mg (as sodium salt) in vial	Aleppo Pharmaceutical Industries (Alpha), Aurobindo Pharma Ltd., Aventis Ltd., Cheil Jedang Corp., Cipla Ltd., Combino Pharm, S.L., Demo S.A., *Hoffman-La Roche Ltd, Pharmaceutical Industry, Lupin Ltd., Mepha Ltd., Neon Laboratories Ltd., Pharmchem International Ltd., Ranbaxy Laboratories Ltd., Strides Arcolab Ltd.

SOURCES AND PRICES OF SELECTED DRUGS AND DIAGNOSTICS FOR PEOPLE LIVING WITH HIV/AIDS

Antibacterials, beta lactam medicines	Manufacturer
ceftriaxone powder for injection, 500 mg (as sodium salt) in vial	Aurobindo Pharma Ltd., Aventis Ltd., Bilim Pharmaceutical Ind., Cheil Jedang Corp., Cipla Ltd., Demo S.A., *Hoffman-La Roche Ltd., Pharmaceutical Industry, IVAX Pharmaceuticals Mexico (S.A. de C.V.), Lyka Labs Ltd., Mepha Ltd., Pharmchem International Ltd., Strides Arcolab Ltd.
procaine benzylpenicillin powder for injection, 3 g (=3 million IU) in vial	Alembic Ltd., Pharmchem International Ltd., Sanavita Aktiengesellschaft & Co., Strides Arcolab Ltd.
Antibacterials, others	
azithromycin oral suspension, 200 mg/5 ml (dihydrate)	Alembic Ltd., Shiba Pharmaceuticals & Chemicals Ltd.
capsule/tablet, 250 mg (dihydrate)	Alembic Ltd., Aleppo Pharmaceutical Industries (Alpha), Cipla Ltd., IPCA Laboratories Ltd., Lyka Labs Ltd., Shiba Pharmaceuticals & Chemicals Ltd., Strides Arcolab Ltd., The Acme Laboratories Ltd.
capreomycin powder for injection, 1 g in vial	Cheil Jedang Corp., Neon Antibiotics PVT. Ltd.
chloramphenicol oily suspension for injection, 0.5 g/ml (as sodium succinate) in 2-ml ampoule	Pharmchem International Ltd.
oral suspension, 150 mg/5 ml (as palmitate)	Pharmchem International Ltd.
powder for injection, 1 g (sodium succinate) in vial	Neon Laboratories Ltd., Pharmchem International Ltd., Sanavita Aktiengesellschaft & Co., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd.
ciprofloxacin tablet, 250 mg (as hydrochloride) tablet, 500 mg (as hydrochloride) tablet, 750 mg (as hydrochloride)	Alembic Ltd., Alpharma, Apotex Mexico Protein, (S.A. de C.V.), Aspen Pharmacare, Aurobindo Pharma Ltd., Aventis Ltd., Bayer Healthcare AG, Cheil Jedang Corp., *Cipla Ltd., Genepharm SA, Glenmark Pharmaceuticals Ltd., Gracure Pharmaceuticals Ltd., Intas Pharmaceuticals Ltd., IPCA Laboratories Ltd., IVAX Pharmaceuticals Mexico (S.A. de C.V.), *Laboratorios Cifra S.A., Lupin Ltd., Lyka Labs Ltd., Mepha Ltd., Orios Juventus S.A., Pharmchem International Ltd., Phyto-Riker Pharmaceuticals Ltd., Pliva d.d., *Ranbaxy Laboratories Ltd., Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd., The Acme Laboratories Ltd.
clarithromycin powder for injection, 500 mg	Strides Arcolab Ltd.
tablet, 250 mg	Alembic Ltd., Alpharma, Bilim Pharmaceutical Ind., Genepharm SA, Intas Pharmaceuticals Ltd., IPCA Laboratories Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Lyka Labs Ltd., Orios Juventus S.A., *Ranbaxy Laboratories Ltd., Remedica Ltd., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd., The Acme Laboratories Ltd., The Government Pharmaceutical Organization

ANNEX 2B. SOURCES OF MEDICINES

Antibacterials, others	Manufacturer
clindamycin	
capsule, 150 mg	Bilim Pharmaceutical Ind., Shiba Pharmaceuticals & Chemicals Ltd.
injection, 150 mg/ml (as phosphate) in 2-ml ampoule	Combino Pharm, S.L.
injection, 150 mg/ml (as phosphate) in 4-ml ampoule	Strides Arcolab Ltd.
cycloserine	
capsule, 250 mg	Cheil Jedang Corp., Pharmadrug
doxycycline	
capsule/tablet, 100 mg (hydrochloride)	Aspen Pharmacare, Beacons Pharmaceuticals Pte Ltd., Cipla Ltd., Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., Intas Pharmaceuticals Ltd., Pharmadrug, Pharmchem International Ltd., Rekah Pharmaceutical Group, Remedica Ltd., Sanavita Aktiengesellschaft & Co., Shiba Pharmaceuticals & Chemicals Ltd., The Acme Laboratories Ltd.
erythromycin	
powder for oral suspension, 125mg (as stearate or ethylsuccinate)	Aventis Ltd., Beacons Pharmaceuticals Pte Ltd., Beltapharm SpA, Gracure Pharmaceuticals Ltd., Lachifarma SRL, Pharmadrug, Pharmchem International Ltd., Purna Pharmaceuticals NV, Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd.
capsule/tablet, 250 mg (as stearate or ethylsuccinate)	Alembic Ltd., Artesan Pharma GmbH & Co. KG, Aurobindo Pharma Ltd., Aventis Ltd., Beacons Pharmaceuticals Pte Ltd., Beltapharm SpA, Cipla Ltd., Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., IPCA Laboratories Ltd., Lachifarma SRL, Lyka Labs Ltd., Pharmchem International Ltd., Phyto-Riker Pharmaceuticals Ltd., Remedica Ltd., Sanavita Aktiengesellschaft & Co., Shiba Pharmaceuticals & Chemicals Ltd., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd.
capsule/tablet, 500 mg (as stearate or ethylsuccinate)	Alembic Ltd., Artesan Pharma GmbH & Co. KG, Aventis Ltd., Cipla Ltd., Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., IPCA Laboratories Ltd., Pharmchem International Ltd., Remedica Ltd., Sanavita Aktiengesellschaft & Co., Shiba Pharmaceuticals & Chemicals Ltd., Strides Arcolab Ltd.
gentamicin	
injection, 10 mg (as sulfate) in 2-ml vial	Aspen Pharmacare, Intas Pharmaceuticals Ltd., Pharmchem International Ltd., Rotexmedica
injection, 40 mg (as sulfate) in 2-ml vial	Aspen Pharmacare, Gracure Pharmaceuticals Ltd., Intas Pharmaceuticals Ltd., Neon Laboratories Ltd., Pharmchem International Ltd., Rotexmedica, Sanavita Aktiengesellschaft & Co.
metronidazole	
injection, 500 mg in 100-ml vial	Aspen Pharmacare, Aventis Intercontinental, Cheil Jedang Corp., Demo S.A., Pharmaceutical Industry, Pharmchem International Ltd., Rotexmedica
suppository, 1 g	Aventis Intercontinental

SOURCES AND PRICES OF SELECTED DRUGS AND DIAGNOSTICS FOR PEOPLE LIVING WITH HIV/AIDS

Antibacterials, others	Manufacturer
ofloxacin	
IV infusion, 2 mg/ml (hydrochloride)	Genepharm SA
IV infusion, 5 mg/ml (hydrochloride)	Aventis Intercontinental
tablet, 200 mg	Aspen Pharmacare, Aventis Intercontinental, Cipla Ltd., Genepharm SA, Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., Intas Pharmaceuticals Ltd., IPCA Laboratories Ltd., Lyka Labs Ltd., Ranbaxy Laboratories Ltd., Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd., Strides Arcolab Ltd.
tablet, 400 mg	Aspen Pharmacare, Cipla Ltd., Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd., Strides Arcolab Ltd.
rifabutin	
capsule, 150 mg	Lupin Ltd.
silver nitrate	
solution (eye drops), 1%	Gracure Pharmaceuticals Ltd.
spectinomycin	
powder for injection, 2 g (as hydrochloride) in vial	Demo S.A., Pharmaceutical Industry, Neon Antibiotics PVT. Ltd., Pharmchem International Ltd.
sulfadiazine	
tablet, 500 mg	*Doms Recordati ^{NPI} , Ecobi Farmaceutici S.a.s., Far Manguinhos, Heyl Chemisch.-pharmazeutische Fabrik GmbH & Co KG, Laboratorio Reig Jofre S.A., Strides Arcolab Ltd.
sulfamethoxazole+trimethoprim	
oral suspension, 200+40 mg/5 ml	Apotex Mexico Protein, (S.A. de C.V.), Aspen Pharmacare, Aventis Ltd., Beacons Pharmaceuticals Pte Ltd., Ecobi Farmaceutici S.a.s., *Hoffman-La Roche Ltd, Hovid SDN. BHN., Lachifarma SRL, Pharmchem International Ltd., Remedica Ltd., Scanpharm A/S, Shiba Pharmaceuticals & Chemicals Ltd., SM Pharmaceuticals Sdn Bhd, The Acme Laboratories Ltd.
tablet, 100+20 mg	Artesan Pharma GmbH & Co. KG, Ecobi Farmaceutici S.a.s., Gracure Pharmaceuticals Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Lachifarma SRL, Lyka Labs Ltd., Pharmchem International Ltd., Rekah Pharmaceutical Group, Shiba Pharmaceuticals & Chemicals Ltd.
tablet, 400+80 mg	Alpharma, Apotex Mexico Protein, (S.A. de C.V.), Artesan Pharma GmbH & Co. KG, Aspen Pharmacare, Aurobindo Pharma Ltd., Aventis Ltd., Beacons Pharmaceuticals Pte Ltd., Ecobi Farmaceutici S.a.s., Far Manguinhos, Gracure Pharmaceuticals Ltd., *Hoffman-La Roche Ltd, Hovid SDN. BHN., Intas Pharmaceuticals Ltd., IPCA Laboratories Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Pharmchem International Ltd., Remedica Ltd., Sanavita Aktiengesellschaft & Co., Shiba Pharmaceuticals & Chemicals Ltd., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd. The Acme Laboratories Ltd., The Government Pharmaceutical Organization
tablet, 800+160 mg	Alpharma, Apotex Mexico Protein, (S.A. de C.V.), Aspen Pharmacare, Aurobindo Pharma Ltd., Aventis Ltd., *Hoffman-La Roche Ltd, Hovid SDN. BHN., Intas Pharmaceuticals Ltd., Pharmchem International Ltd., Rekah Pharmaceutical Group, Shiba Pharmaceuticals & Chemicals Ltd., Strides Arcolab Ltd.

ANNEX 2B. SOURCES OF MEDICINES

Antibacterials, others	Manufacturer
tetracycline tablet, 500 mg	Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., Pharmchem International Ltd.
Antifilarials	
crotamiton cream/lotion 10%	SM Pharmaceuticals Sdn Bhd
Antifungal medicines	
amphotericin B powder for injection, 50 mg in vial	Combino Pharm, S.L., Neon Antibiotics PVT. Ltd.
clotrimazole cream, 1%	Aspen Pharmacare, Beacons Pharmaceuticals Pte Ltd., Cipla Ltd., Gracure Pharmaceuticals Ltd., Pharmadrug, Pharmchem International Ltd., Purna Pharmaceuticals NV, Remedica Ltd., SM Pharmaceuticals Sdn Bhd, The Acme Laboratories Ltd., The Government Pharmaceutical Organization,
pessary, 500 mg	Gracure Pharmaceuticals Ltd., Remedica Ltd.
fluconazole capsule, 50 mg	Cipla Ltd., Pliva d.d., *Ranbaxy Laboratories Ltd.
capsule, 150 mg	Bilim Pharmaceutical Ind., Cipla Ltd., Gracure Pharmaceuticals Ltd., Intas Pharmaceuticals Ltd., Pliva d.d., *Ranbaxy Laboratories Ltd., Shiba Pharmaceuticals & Chemicals Ltd.
capsule, 200 mg	Cipla Ltd., IPCA Laboratories Ltd., Pliva d.d., *Ranbaxy Laboratories Ltd., Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd., The Government Pharmaceutical Organization
solution for injection, 2mg/ml in ampoule	Genepharm SA, Laboratorio Reig Jofre S.A.
itraconazole capsule, 100 mg	Intas Pharmaceuticals Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), SM Pharmaceuticals Sdn Bhd
ketoconazole cream, 2%	Apotex Mexico Protein, (S.A. de C.V.), Aspen Pharmacare, Beacons Pharmaceuticals Pte Ltd., Gracure Pharmaceuticals Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Purna Pharmaceuticals NV
tablet, 200 mg	Artesan Pharma GmbH & Co. KG, Aspen Pharmacare, Beltapharm SpA, Bilim Pharmaceutical Ind., Far Manguinhos, Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., Intas Pharmaceuticals Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Lachifarma SRL, Pharmadrug, Pharmchem International Ltd., Remedica Ltd., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd., The Government Pharmaceutical Organization

SOURCES AND PRICES OF SELECTED DRUGS AND DIAGNOSTICS FOR PEOPLE LIVING WITH HIV/AIDS

Antifungal medicines	Manufacturer
miconazole	
cream/ointment 2% (as nitrate) 15 g tube	Beacons Pharmaceuticals Pte Ltd., Hovid SDN. BHN., Lachifarma SRL, Pharmchem International Ltd., Purna Pharmaceuticals NV
cream/ointment 2% (as nitrate) 20 g tube	Apotex Mexico Protein, (S.A. de C.V.)
cream/ointment 2% (as nitrate) 30 g tube	Beltapharm SpA, Ecobi Farmaceutici S.a.s., Gracure Pharmaceuticals Ltd., Lachifarma SRL, Pharmadrug, Pharmchem International Ltd., Purna Pharmaceuticals NV
cream/ointment 2% (as nitrate) 40 g tube	IVAX Pharmaceuticals Mexico, (S.A. de C.V.)
nystatin	
pessary, 100,000 IU	Artesan Pharma GmbH & Co. KG, Cipla Ltd., Pharmadrug, SM Pharmaceuticals Sdn Bhd, The Acme Laboratories Ltd.
tablet, 100,000 IU	Artesan Pharma GmbH & Co. KG, Cipla Ltd.
tablet, 500,000 IU	Apotex Mexico Protein, (S.A. de C.V.), Artesan Apotex Mexico Protein, (S.A. de C.V.), Artesan Pharma GmbH & Co. KG, Cipla Ltd., Pharmadrug, Sanavita Aktiengesellschaft & Co., The Acme Laboratories Ltd.
Antiprotozoal medicines	
pentamidine	
powder for injection, 200 mg (isetionate) in vial	Neon Antibiotics PVT. Ltd.
powder for injection, 300 mg (isetionate) in vial	Aventis Intercontinental, Combino Pharm, S.L., Lab. Filaxis International S.A., Neon Antibiotics PVT. Ltd.
pyrimethamine	
tablet, 25 mg	Gracure Pharmaceuticals Ltd., Shiba
tinidazole	
tablet, 500 mg	Gracure Pharmaceuticals Ltd., Intas Pharmaceuticals Ltd., Remedica Ltd.
Antiviral medicines	
aciclovir	
cream, 5%	*Cipla Ltd., Ecobi Farmaceutici S.a.s., Gracure Pharmaceuticals Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.)
powder for injection, 250 mg (as sodium salt) in 10-ml vial	Combino Pharm, S.L., Lab. Filaxis International S.A., Neon Antibiotics PVT. Ltd.
tablet, 200 mg	Alpharma, Apotex Mexico Protein, (S.A. de C.V.), Aspen Pharmacare, Beacons Pharmaceuticals Pte Ltd., *Cipla Ltd., Hovid SDN. BHN., IPCA Laboratories Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Lab. Filaxis International S.A., Pharmadrug, *Ranbaxy Laboratories Ltd., Remedica Ltd., Samchully Pharm. Co., Ltd., SM Pharmaceuticals Sdn Bhd
tablet, 400 mg	Alpharma, Aspen Pharmacare, Beacons Pharmaceuticals Pte Ltd., *Cipla Ltd., Ecobi Farmaceutici S.a.s., Hovid SDN. BHN., IPCA Laboratories Ltd., *Ranbaxy Laboratories Ltd., Remedica Ltd., Samchully Pharm. Co., Ltd., SM Pharmaceuticals Sdn Bhd
tablet, 800 mg	*Cipla Ltd., Combino Pharm, S.L., Ecobi Farmaceutici S.a.s., IPCA Laboratories Ltd., Lab. Filaxis International S.A., Laboratorios Cinfa S.A., *Ranbaxy Laboratories Ltd., Remedica Ltd.

ANNEX 2B. SOURCES OF MEDICINES

Antiviral medicines	Manufacturer
ganciclovir powder for IV infusion, 500 mg in vial	*Hoffmann-La Roche Ltd., Lab. Filaxis International S.A.
Antiviral medicines – Antiretrovirals	
abacavir (ABC) syrup, 20 mg/ml	*Glaxo SmithKline
tablet, 300 mg	Cipla Ltd., *Glaxo SmithKline
didanosine (ddl) buffered chewable tablet, 100 mg	Apotex Mexico Protein, (S.A. de C.V.), Aurobindo Pharma Ltd., *Bristol-Myers Squibb (FR), Bristol-Myers Squibb (SA), Cipla Ltd., Donato y Zurlo S.A., Far Manguinhos, Ranbaxy Laboratories Ltd., Strides Arcolab Ltd.
buffered chewable tablet, 25 mg	Apotex Mexico Protein, (S.A. de C.V.), *Bristol-Myers Squibb (FR), Bristol-Myers Squibb (SA), Cipla Ltd., Far Manguinhos, Strides Arcolab Ltd.
syrup, 2 g	*Bristol-Myers Squibb (FR), Bristol-Myers Squibb (SA)
unbuffered enteric coated capsule, 250 mg	Bristol-Myers Squibb (FR), Cipla Ltd., Ranbaxy Laboratories Ltd.
unbuffered enteric coated capsule, 400 mg	Bristol-Myers Squibb (FR), Cipla Ltd., Ranbaxy Laboratories Ltd.
efavirenz (EFZ) capsule, 200 mg	Aurobindo Pharma Ltd., Cipla Ltd., Lab. Filaxis International S.A., Ranbaxy Laboratories Ltd.
tablet, 600 mg	Aurobindo Pharma Ltd., Cipla Ltd., Ranbaxy Laboratories Ltd.
indinavir (IDV) capsule, 200 mg	Cipla Ltd., Donato y Zurlo S.A., *Hetero Drugs Ltd. ^{NPI} , New GPC Inc.
capsule, 400 mg	Aurobindo Pharma Ltd., Cipla Ltd., Far Manguinhos, Lab. Filaxis International S.A., Strides Arcolab Ltd., *Ranbaxy Laboratories Ltd.
lamivudine (3TC) syrup, 50 mg/5 ml	*Cipla Ltd., *Glaxo SmithKline, The Government Pharmaceutical Organization
tablet, 150 mg	Aurobindo Pharma Ltd., Cheil Jedang Corp., *Cipla Ltd., Donato y Zurlo S.A., Far Manguinhos, *Glaxo SmithKline, *Hetero Drugs Ltd. ^{NPI} , Intas Pharmaceuticals Ltd., IPCA Laboratories Ltd., Lab. Filaxis International S.A., New GPC Inc., *Ranbaxy Laboratories Ltd., Strides Arcolab Ltd. , The Government Pharmaceutical Organization
tablet, 300 mg	Ranbaxy Laboratories Ltd.
nelfinavir (NFV) capsule, 250 mg	Aurobindo Pharma Ltd., Cipla Ltd., Donato y Zurlo S.A., F. *Hoffmann-La Roche Ltd., Lab. Filaxis International S.A.
powder for oral solution, 50 mg/g	*Hoffmann-La Roche Ltd
nevirapine (NVP) syrup, 50 mg/5 ml	*Boehringer Ingelheim GmbH, Cipla Ltd., The Government Pharmaceutical Organization

ANNEX 2B. SOURCES OF MEDICINES

Antiviral medicines - Antiretrovirals (combinations)	Manufacturer
3TC/AZT tablet, 300/150 mg	Aurobindo Pharma Ltd., Cheil Jedang Corp., *Cipla Ltd., Donato y Zurlo S.A., Far Manguinhos, *Glaxo SmithKline, *Hetero Drugs Ltd ^{NPI} Lab. Filaxis International S.A., New GPC Inc, *Ranbaxy Laboratories Ltd., Strides Arcolab Ltd., The Government Pharmaceutical Organization
3TC/d4T/NVP tablet, 150/30/200 mg	*Ranbaxy Laboratories Ltd.
tablet, 150/40/200 mg	Cheil Jedang Corp., *Cipla Ltd., New GPC Inc, *Ranbaxy Laboratories Ltd., Strides Arcolab Ltd., The Government Pharmaceutical Organization
ABC/3TC/ZDV tablet, 300/150/300 mg	*Glaxo SmithKline, Ranbaxy Laboratories Ltd.
AZT/3TC/NVP tablet, 300/150/200 mg	Aurobindo Pharma Ltd., Cipla Ltd.

Table 2. Antineoplastic medicines

Cytotoxic medicines	Manufacturer
bleomycin powder for injection, 15 mg 15 mg (as sulfate) in vial	Aventis Intercontinental, Neon Antibiotics PVT. Ltd.
calcium folinate (leucovorin) tablet, 15 mg	Ecobi Farmaceutici S.a.s., Lab. Filaxis International S.A., Medac GmbH, International Operations
doxorubicine HCl powder for injection, 10 mg in 5-ml vial	Lab. Filaxis International S.A., Medac GmbH, International Operations, Neon Antibiotics PVT. Ltd., Pharmchem International Ltd.
powder for injection, 50 mg in 25-ml vial	Lab. Filaxis International S.A., Medac GmbH, International Operations, Neon Antibiotics PVT. Ltd., Pharmchem International Ltd.
etoposide injection, 20 mg/ ml in 5-ml ampoule	Cipla Ltd., Intas Pharmaceuticals Ltd., Lab. Filaxis International S.A., Medac GmbH, International Operations, Neon Antibiotics PVT. Ltd.
methotrexate injection, 25 mg/ml (as sodium salt) in 2-ml vial	Aventis Intercontinental, Neon Antibiotics PVT. Ltd.
powder for injection, 50 mg (as sodium salt) in 2-ml vial	Aventis Intercontinental, Lab. Filaxis International S.A., Neon Antibiotics PVT. Ltd.
tablet, 2.5 mg	Aventis Intercontinental, Cipla Ltd., Neon Antibiotics PVT. Ltd., Remedica Ltd.
vinblastine powder for injection, 10 mg (sulfate) in 10-ml vial	*Cipla Ltd., Lab. Filaxis International S.A., Neon Antibiotics PVT.Ltd.

SOURCES AND PRICES OF SELECTED DRUGS AND DIAGNOSTICS FOR PEOPLE LIVING WITH HIV/AIDS

Cytotoxic medicines	Manufacturer
vincristine injection, 1 mg/ml (sulfate) in vial	*Cipla Ltd., Lab. Filaxis International S.A., Pharmchem International Ltd.
powder for injection, 1 mg (sulfate) in 1-ml vial	Neon Antibiotics PVT. Ltd.
vinorelbine injection concentrate 10 mg/ml in vial	

Table 3. Medicines used for the treatment of mental and substance abuse disorders

Medicines used in depressive disorders	Manufacturer
amitriptyline tablet, 25 mg (as hydrochloride)	Aspen Pharmacare, Gracure Pharmaceuticals Ltd., Intas Pharmaceuticals Ltd., Pharmchem International Ltd., Remedica Ltd., The Government Pharmaceutical Organization
fluoxetine tablet, 20 mg	Apotex Mexico Protein, (S.A. de C.V.), Aspen Pharmacare, Combindo Pharm, S.L., Genepharm SA, IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Laboratorios Cinfa S.A., Pharmchem International Ltd., Ranbaxy Laboratories Ltd., Remedica Ltd.
Medicines used in generalized anxiety and sleep disorders	
methotrimepazine/levomepromazine tablet, 25 mg	Aventis Intercontinental, Pharmadrug
Medicines used in treatment of opioid dependence	
naltrexone HCl tablet, 50 mg	Intas Pharmaceuticals Ltd., Lachifarma SRL

Table 4. Analgesics

Opioid analgesics	Manufacturer
codeine tablet, 30 mg (phosphate)	Aspen Pharmacare, Beacons Pharmaceuticals Pte Ltd., Pharmchem International Ltd., Rekah Pharmaceutical Group, Remedica Ltd.
methadone tablet, 5 mg	Pharmchem International Ltd.
morphine injection, 10 mg/ml (sulfate or HCl), in 1-ml ampoule	Aspen Pharmacare, Lab. Renaudin, Martindale Pharmaceuticals Ltd., Molteni Farmaceutici, Pharchem International Ltd.
oral solution, 10 mg/5 ml (sulfate or HCl)	Molteni Farmaceutici, Pharmchem International Ltd.

Opioid analgesics	Manufacturer
pethidine	
injection, 50 mg/ml (hydrochloride) in 1-ml ampoule	Aspen Pharmacare, Martindale Pharmaceuticals Ltd., Neon Laboratories Ltd., Pharmchem International Ltd.
injection, 50 mg/ml (hydrochloride) in 2-ml ampoule	Aspen Pharmacare, Lab. Renaudin, Martindale Pharmaceuticals Ltd., Molteni Farmaceutici, Neon Laboratories Ltd., Pharmadrug, Pharmchem International Ltd.
tablet, 50 mg	Martindale Pharmaceuticals Ltd., Pharmchem International Ltd.
tablet, 100 mg	Pharmchem International Ltd.

Table 5. Gastrointestinal medicines

Antacids and other antiulcer medicines	Manufacturer
omeprazole	
capsule, 10 mg	Aventis Ltd., Cipla Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Lyka Labs Ltd., Mepha Ltd., Shiba Pharmaceuticals & Chemicals Ltd., SM Pharmaceuticals Sdn Bhd
capsule, 20 mg	Alembic Ltd., Apotex Mexico Protein, (S.A. de C.V.), Aurobindo Pharma Ltd., Aventis Ltd., Cipla Ltd., Demo S.A., Pharmaceutical Industry, Genepharm SA, Gracure Pharmaceuticals Ltd., Hovid SDN. BHN., Intas Pharmaceuticals Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Laboratorios Andr—maco S.A., Laboratorios Cinfa S.A., Mepha Ltd., Remedica Ltd., Shiba Pharmaceuticals & Chemicals Ltd., SM Pharmaceuticals Sdn Bhd, Strides Arcolab Ltd. , The Acme Laboratories Ltd.
capsule, 40 mg	Aurobindo Pharma Ltd., Aventis Ltd., IVAX Pharmaceuticals Mexico, (S.A. de C.V.), Laboratorios Andr—maco S.A., Mepha Ltd., Shiba Pharmaceuticals & Chemicals Ltd., The Acme Laboratories Ltd.
powder for injection, 40 mg (as sodium salt) in vial	Neon Antibiotics PVT. Ltd.,
powder for IV infusion, 40 mg (as sodium salt) in vial	Genepharm SA, Neon Antibiotics PVT. Ltd.
Antiemetic medicines	
dimenhydrinate	
tablet, 50 mg	Apotex Mexico Protein, (S.A. de C.V.), Beacons Pharmaceuticals Pte Ltd., Laboratorios Cinfa S.A., The Government Pharmaceutical Organization

2. FEEDBACK

What did you think of the publication in general?

- Excellent, very useful Good, quite useful Satisfactory, reasonably useful
 Poor, not useful—please indicate why: _____

What did you think of the medicines included in the publication?

- Good selection of medicines
 More medicines required, for example: _____
 Fewer medicines required, remove: _____

What did you think of the pricing information?

- Good, enough information on the prices of drugs of interest
 Poor, not enough information

Have you contacted any of the manufacturers listed?

- Yes No

Other comments:

3. ENQUIRY

- I would like to participate in the next Survey (Manufacturing companies only)
 I would like to receive more copies of the Publication

General background and objectives

This is the sixth edition of “Untangling the web of price reductions: a pricing guide for the purchase of ARVs for developing countries”. The first edition was published in October 2001^[1].

The lack of clear information on pharmaceutical prices on the international market is a significant barrier to improving access to essential medicines in developing countries. The situation is particularly complex in the case of antiretrovirals (ARVs).

The data in this guide on ARV prices offered by originator companies and some generic companies in low- and middle-income countries are meant to provide potential buyers with clear and verified data. This information is intended for use by government and non-profit procurement agencies, as well as other bulk purchasers of ARVs, including health facilities and non-governmental organisations (NGOs).

This document includes pricing information on both adult and paediatric formulations, and is meant to be used in tandem with

the pre-qualification report called “Pilot Procurement, Quality and Sourcing Project: Access to HIV/AIDS Drugs and Diagnostics of Acceptable Quality”, a project initiated by WHO and developed in collaboration with other United Nations Organisations (UNAIDS, UNICEF, UNFPA). This pre-qualification project evaluates pharmaceutical manufacturers and products according to WHO recommended standards of quality and compliance with Good Manufacturing Practices. WHO pre-qualification is given to specific products produced by specific companies at specific manufacturing sites. It is part of an ongoing process that will expand as the participation of suppliers increases.

An updated list of products is regularly posted on the websites of WHO and other UN-collaborating agencies^[2]; products on this list are commonly referred to as “WHO pre-qualified”. This list of “pre-qualified” drugs is an important tool for NGOs and Governments to assist them with drug procurement.

In all the tables in this report, pre-qualified products are indicated in bold and with an asterisk.

This sixth edition provides:

- **updated information** on prices for eligible countries, including both price per unit and price per patient per year for adult and paediatric formulations
- **updated information and clarifications** on the conditions and restrictions applying to these offers
 - **practical examples**

compliance. For further information see MSF Briefing Note on FDCs^[4]. The new edition of WHO Treatment Guidelines specially mentions the usefulness of FDCs in resource-poor settings. Not only are FDCs advantageous from a medical point of view, but they are also the most affordable option in most cases. The triple FDC d4T/3TC/NVP from two generic manufacturers has recently been prequalified by WHO.

Methodology

In order to obtain accurate information on discounted price offers by both originator and generic companies, firms were contacted and asked to provide information about drug, dosage and pharmaceutical form, price per unit (or daily dose), restrictions that apply to the offers (eligibility), and

Pricing information on other essential drugs and diagnostics used for HIV/AIDS can be found in the last version of “Sources and Prices of Selected Medicines and Diagnostics for People Living with HIV/AIDS”^[3].

We have indicated fixed-dose combinations (FDCs) in this report since MSF has found that using these products facilitates program implementation and patient

additional comments. The list of generic companies included in this report is by no means exhaustive^[5]. All generic drugs included in this pricing guide have at least been cleared for marketing in their countries of origin.

- All prices are quoted in US dollars and conversions were made on the day the price was received.
- All prices were checked and verified by companies.
- In table 1, prices are rounded. The exact prices including decimals are in table 2.

The annual cost of therapy was calculated according to WHO^[6] and Centres for Disease Control and Prevention (CDC)^[7] dosing schedules (for those products not recommended in the WHO Guidelines).

Prices
Since 2000, the international prices of some first-line ARVs have tumbled, due to competition from generic companies, sustained public pressure, discount offers from originator companies, and the

growing political attention paid to the AIDS epidemic. Several major events have played a key role, beginning with a precedent set by Brazil which made a triple drug combination possible at less than US\$3000 per patient per year (ppy) in the 90s.

Public pressure on the pharmaceutical companies built up over the following years, and in May 2000, five originator companies announced a new partnership, the Accelerating Access Initiative (AAI). It was the first time that these companies had initiated differential pricing policies for ARVs. In February 2001, the Indian generics firm Cipla shattered the price barrier when it publicly announced that it would sell a triple combination for US\$350 ppy. Due to this type of competition, prices continue to fall. Today, the cheapest triple combination (FDC) prequalified by WHO costs US\$244/year.

The graph on page 6 shows the evolution of prices since August 2001 for WHO recommended first line regimens.

Other initiatives, like the Andean initiative or more recently the Clinton Foundation announcement, are also bringing down prices. The Andean initiative, through regional negotiations with pharmaceutical companies, has fixed a reference price for all the countries in the region. The Clinton Foundation has brokered a deal with generic makers which brings fixed dose triple combinations down to US\$140 per year. These initiatives although not widely available will affect some specific countries.

Prices cited in this document are the best international offers made by companies, but delivery conditions must be taken into account. Both generics and originator companies impose restrictions on their offers, but only originator companies apply geographical limits (a differential pricing policy).

Barriers to accessing price offers

Information is presented in a table format to facilitate the comparison of price offers. This format highlights the lack of standardisation among

different companies on eligibility and terms and conditions. For instance, some companies use UNCTAD (Least Developed Countries) criteria, others UNDP, some others World Bank classification (Human Development Index).

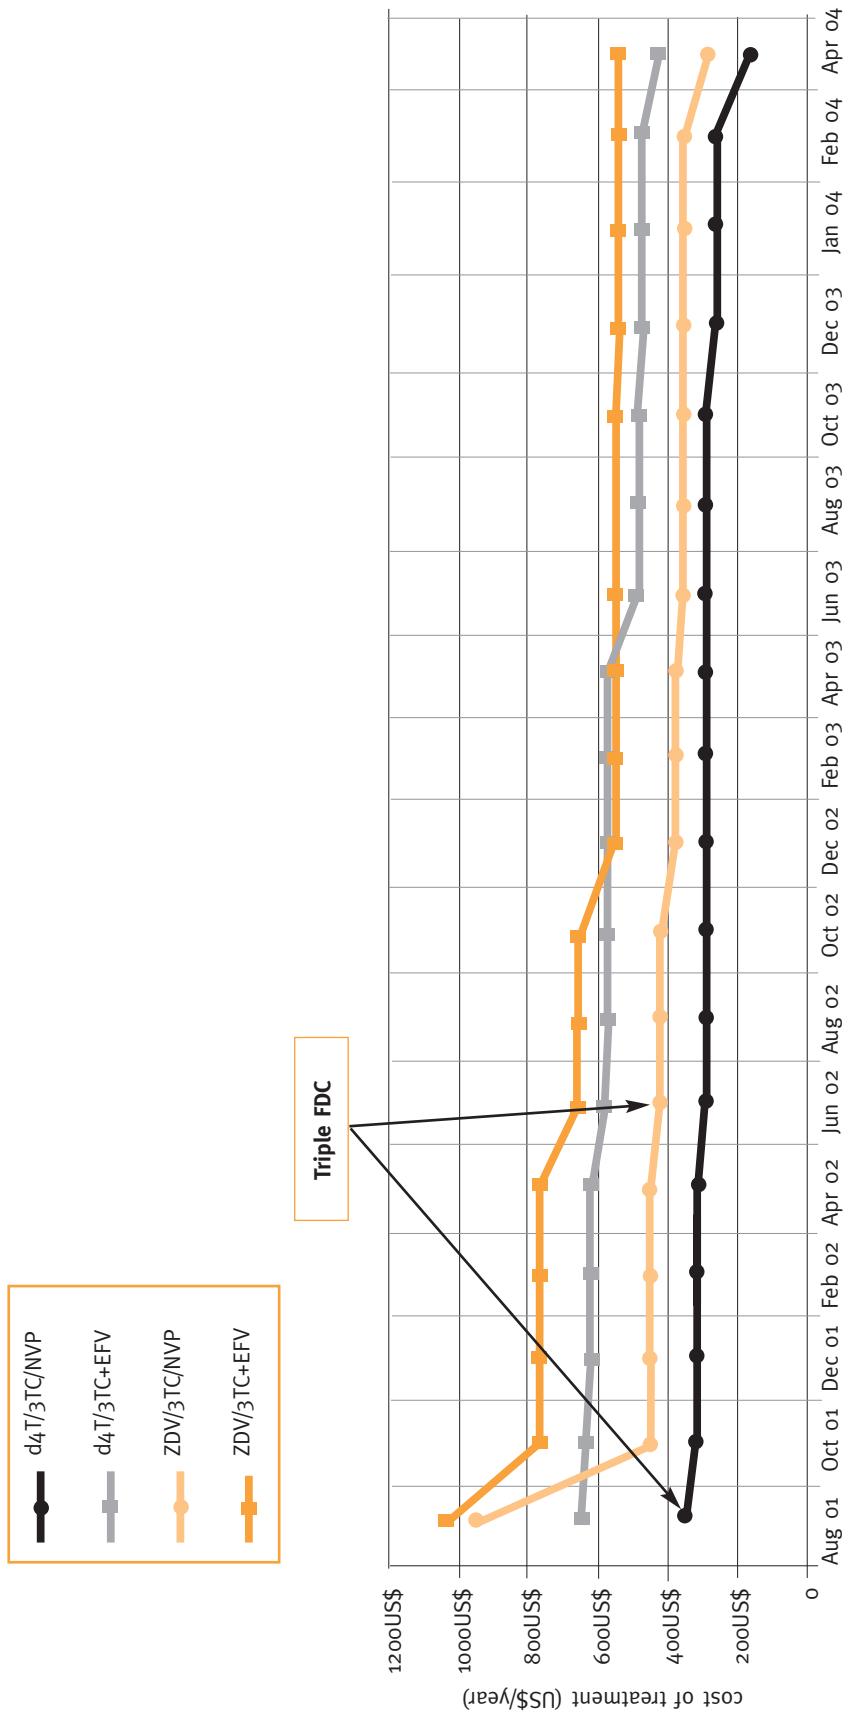

It should be noted that some developing countries have been excluded by some or all companies. It means that some countries cannot benefit from any differential price. In regions like Eastern Europe, only 24% of the countries can benefit from the best price and in Latin America and Caribbean, only 31%.*

It is important to mention that geographical limitations do not concern FDCs, since most FDCs are produced by generic companies.

Even when a specific country is eligible, all purchasers within the country may not be eligible for reduced prices. The conditions of some offers can be restrictive and sometimes only NGOs, Governments and national and international institutions are eligible.

* We refer to best possible prices (those in Table 1), but we note that some companies (Roche and Merck & Co., Inc.) offer also a second differential price. The conditions for these second prices are less restrictive and can be found in Table 2.

Evolution of prices since August 2001 of WHO recommended first line regimens

The chart above shows that efavirenz containing regimens are more expensive. In addition there is no EFV containing triple FDC available on the market yet.

Delivery conditions also affect prices. In many cases clearance fees, importation taxes (when they exist) and transport are not included. Another barrier to accessing the best price is drug availability in a country. Since ARVs are not always registered and/or available in “selected countries”, many offers from pharmaceutical companies may remain “theoretical”.

In addition, prices cited in this report may not correspond to end-user prices (prices to patients), since other factors may increase prices such as national distribution and handling charges, mark-up rates, and national and/or import and sales taxes.

present analysis. Some information about the patent status of ARVs in some countries can be found in “Patent Situation of HIV/AIDS related drugs in 80 countries”, WHO/UNAIDS, 2000^[8] and the MSF report “Drug patents under the spotlight: sharing practical knowledge about pharmaceutical patents”, May 2003^[9]. For further details, refer to the practical guide “HIV/AIDS medicines and related supplies: contemporary context and procurement”, in particular Chapter 4 and Annex B (The World Bank, Washington, February 2004).

The challenge of paediatric formulations

There is an urgent need to develop fixed-dose combinations for use in children. Protocols for paediatric patients are complicated and expensive. The prices of paediatric formulations remain higher than those for adults, especially for second line treatments. For example, a paediatric patient would

have to pay USD 284 per year for a d4T+3TC+NVP regimen using three different syrups while an adult will take the same regimen in a FDC for USD 244. For a second line (ZDV+ddl+NFV), the cost of treatment for a child would be USD 3150/year while for the adult it would be USD 1096 per year. In this case, none of them would be able to use a FDC.**

Research and development (R&D) for HIV/AIDS

Paediatric formulations are not the only area where there is a need for R&D. For both adults and children, new drugs, diagnostic tools, and vaccines are needed for HIV/AIDS. Pharmaceutical investment in research and development largely responds to market potential in the industrialised world. We need to ensure that R&D also responds to the needs of patients in developing and least developed countries.

* For these examples we used the case of a 10 kg, 3 year old patient in an MSF project, following the protocols of this project. When comparing prices we used the best possible price for every molecule.

How to use these tables

Prices: table 1 shows the best price offers of some generic and originator producers for each antiretroviral drug, (including fixed-dose combinations), regardless of eligibility conditions. Figures within brackets indicate price in US\$ per unit (capsules, tablets etc.). Prices per patient per year have been calculated according to daily doses given either in WHO guidelines or in CDC guidelines (for those products not recommended in WHO guidelines). Prices can be used as a reference with suppliers. Originator companies set different prices depending on the country. Which country is eligible and the conditions to benefit from these differential prices are specified in Table 2.

Restrictions: table 2 shows restrictions imposed by generic (2f) and originator (2a to 2e) companies and provides indications about the availability of offers in individual countries. There is no uniform differential pricing system and each originator company sets geographical limits to their programmes. Generic companies have no geographical limits but may have quantity related conditions.

Please refer to Annexes 1, 2 and 4 for updated country classification by UNCTAD (Least Developed Countries), UNDP (Human Development Index) and World Bank (Low income Countries). Annex 3 lists sub-Saharan countries.

This document is also available in French and Spanish on
www.accessmed-msf.org

The following table (pages 9 and 10) summarises prices and eligibility conditions of three products from three different companies in four countries.

Practical examples: Price and eligibility of three products from three different companies in four countries

COMPANIES and OFFERS	<p>Merck Stocrin® (efavirenz) 600 mg</p> <p>Prices and eligibility (countries):</p> <ul style="list-style-type: none"> - US\$ 346.75/year for Low Human Development Index (HDI) countries plus medium HDI countries with adult HIV prevalence of 1% or greater^[10] - US\$ 767/year for medium HDI countries with adult HIV prevalence less than 1%^[11] <p>Delivery of goods: CIF^[10]</p> <p>Eligibility (bodies): Governments, international organizations, NGOs, private sector organizations (e.g. employers, hospitals and insurers). ¹ LDC : Least Developed Country according to UNCTAD classification. See annex 1 of this document for full list of LDCs. ² HDI : Human Development Index according to UNDP classification. Countries are classified on Low HDI, Medium HDI and High HDI (this last one does not concern differential prices). Low and Middle HDI lists of countries are in the Annex 2 of this document. ³ World Bank classification depends on income. Countries are classified as Low Income Economies, Middle-Low Income Economies and Upper, Middle Income Economies (these last two do not concern differential prices). Low income Economy and Lower-Middle Income Economy countries are listed in the Annex 4 of this document. ⁴ See annex 3 of this document for full list of sub-Saharan African countries published by the World Bank. ⁵ Merck prices depend on Adult HIV prevalence, which is periodically reviewed by UNAIDS (www.who.int/epic-hiv/fact_sheets/All_countries.html).

abacavir 300mg tablets (Ziagen®)	GlaxoSmithKline	Least Developed Countries (LDCs) plus sub-Saharan Africa. All projects fully financed by the Global Fund to fight AIDS, TB and Malaria. <i>(For middle income developing countries public sector prices negotiated on a case-by-case basis or bilaterally through the AAI).</i>	Governments, aid organizations, charities, UN agencies, other not-for-profit organizations and international purchase funds such as the Global Fund to fight AIDS, TB and Malaria. In sub-Saharan Africa employers there who offer HIV/AIDS care and treatment directly to their staff through workplace clinics or similar arrangements are also eligible. All organizations must supply the preferentially priced products on a not for profit basis.	US\$ 887/year (US\$ 1.215/unit)	Supply Agreement required (For NGOs requiring less than 10 patient packs per month, this requirement may be waived). The manufacturer recommends that 'prescribers must ensure that patients are fully informed regarding hypersensitivity reaction to abacavir. Patients developing signs or symptoms must contact their doctor immediately for advice.'	CIP
abacavir 20mg/ml oral solution 240ml (Ziagen®)	GlaxoSmithKline	Least Developed Countries (LDCs) plus sub-Saharan Africa. All projects fully financed by the Global Fund to fight AIDS, TB and Malaria. <i>(For middle income developing countries public sector prices negotiated on a case-by-case basis or bilaterally through the AAI).</i>	Governments, aid organizations, charities, UN agencies, other not-for-profit organizations and international purchase funds such as the Global Fund to fight AIDS, TB and Malaria. In sub-Saharan Africa employers there who offer HIV/AIDS care and treatment directly to their staff through workplace clinics or similar arrangements are also eligible. All organizations must supply the preferentially priced products on a not for profit basis.	US\$ 31.32 per bottle	Supply Agreement required (For NGOs requiring less than 10 patient packs per month, this requirement may be waived). The manufacturer recommends that 'prescribers must ensure that patients are fully informed regarding hypersensitivity reaction to abacavir. Patients developing signs or symptoms must contact their doctor immediately for advice.'	CIP

Glossary^[12]

3TC lamivudine; nucleoside analogue reverse transcriptase Inhibitor

AAI United Nations Accelerating Access Initiative; Accelerated Access emerged out of the partnership initiated in May 2000 between the UN (UNFPA, UNICEF, WHO, the World Bank and UNAIDS Secretariat) and five pharmaceutical companies (Boehringer-Ingelheim GmbH, Bristol-Myers Squibb,

GlaxoSmithKline, Merck & Co., Inc., and F. Hoffmann-La Roche Ltd (Roche); Abbott Laboratories Ltd. joined the initiative later) to increase access to HIV/AIDS care, treatment and support. AAI plays a role in facilitating price negotiations between developing country governments and ‘originator’ drug companies that are participating in the AAI.

ABC abacavir; nucleoside analogue reverse transcriptase inhibitor

AIDS Acquired Immune Deficiency Syndrome

ARVs Antiretroviral drugs

BMS Bristol-Myers Squibb

CDC Centres for Disease Control and Prevention

CIF^[10] ‘Cost Insurance and Freight’ means that the seller delivers when the goods pass the ship’s rail in the port of shipment. The seller must pay the costs and freight necessary to bring the goods to the named port of destination BUT the risk of loss or damage to the goods, as well as any additional costs due to events occurring after the time of delivery, are transferred from the seller to the buyer.

CIP^[10] ‘Carriage and Insurance paid to...’ means that the seller delivers the goods to the carrier nominated by him but the seller must in addition pay the cost of carriage necessary to bring the goods to the named destination. This means that the buyer bears all the risks and any additional costs occurring after the goods have been so delivered. However, in CIP the seller also has to procure insurance against the buyer’s risk of loss of or damage to the goods during the carriage.

Consequently, the seller contracts for insurance and pays the insurance premium.

d4T stavudine; nucleoside analogue reverse transcriptase inhibitor

ddI didanosine; nucleoside analogue reverse transcriptase inhibitor

DDU^[10] ‘Delivered duty unpaid’ means that the seller delivers the goods to the buyer, not cleared for import, and not unloaded from any arriving means of transport at the named place of destination. The seller has to bear the costs and risks involved in bringing the goods thereto, other than, where applicable, any ‘duty’ (which term includes the responsibility for the risks of the carrying out of the customs formalities, and the payment of formalities, customs duties, taxes and other charges) for import in the country of destination. Such ‘duty’ has to be borne by the buyer as well as any costs and risks caused by his failure to clear the goods for the import time.

EML Essential Medicines List. First published by WHO in 1977, it is meant to identify a list of medicines, which provide safe and effective treatment for the infectious and chronic diseases, which affect the vast majority of the world’s population. The 12th Updated List was published in April 2002 and includes 12 antiretrovirals.

EFV or EFZ efavirenz; non-nucleoside analogue reverse transcriptase inhibitor

EXW^[10] ‘Ex-works’ means that the

seller delivers when he places the goods at the disposal of the buyer at the seller's premises or another named place (i.e. works, factory, warehouse etc.) not cleared for export and not loaded on any collecting vehicle.	FOB ^[10] 'Free on board' means that the seller delivers when the goods pass the ship's rail at the named port of shipment. This means that the buyer has to bear all costs and risks of loss or damage to the goods from that point. The FOB term requires the seller to clear the goods for export.	Generic drug According to WHO, a pharmaceutical product usually intended to be interchangeable with the innovator product, which is usually manufactured without a license from the innovator company. Generic products may be marketed either under a non-proprietary or approved name rather than a proprietary name.
IDV indinavir; protease inhibitor		GPO Governmental Pharmaceutical Organization (Thailand)
LDCs Least Developed Countries, according to United Nations classification		GSK GlaxoSmithKline
SQV ggc saquinavir soft gel capsules; protease inhibitor		HIV Human Immunodeficiency Virus
TDF tenofovir; nucleotide reverse transcriptase inhibitor		

UNAIDS United Nations Joint Co-sponsored Programme on HIV/AIDS, created in 1996, to lead, strengthen and support an expanded response to the HIV/AIDS epidemic. The six original Cosponsors are UNICEF, UNDP, UNFPA, UNESCO, WHO and the World Bank. UNDCP joined in April 1999	UNDP United Nations Development Programme	WHO World Health Organization
MSD Merck Sharp & Dome (Merck & Co., Inc.)	NRTI Nucleoside Analogue Reverse Transcriptase Inhibitor	ZDV zidovudine; nucleoside analogue reverse transcriptase inhibitor
MSF Médecins Sans Frontières	NNRTI Non-Nucleoside Reverse Transcriptase Inhibitor	NVP nevirapine; non-nucleoside analogue reverse transcriptase inhibitor
NGO Non Governmental Organization		
NFV nelfinavir; protease inhibitor		
		PMTCT Prevention of Mother-To-Child Transmission
		r ritonavir, low dose ritonavir used as a booster; protease inhibitor
		SQV hgc saquinavir hard gel capsules; protease inhibitor
