

Answers to questions from potential bidders

RFP-2013-21

Analysis and Visualization Package for tracking the 2011 declaration of commitments targets

Publishing Date: 21/08/2013

1. Who are the intended users (apart from administrators) of the proposed analytical tool? And what will be the relative roles for the same?

HQ focal points, UNAIDS Regional Office, and the UNAIDS Country office.

2. What is the data-source for generating these reports? (In which database the relevant data is available?)

The data source for the proposed analytical tool will be CSV files generated by the existing "Ten Targets Tracking Tool".

3. Is the data in the CSV generated user-based? Or will that be survey-based data which is collected from all users and generated in the CSV files?

CSV is generated from data collection system.

4. How frequently the CSV files are generated?

The CSV files will be uploaded into proposed analytical tool based on predefined frequency (which can be managed by admin). The database will be built upon the data fetched from these files on regular basis.

5. How many reports are expected to be generated out of this tool?

One report, for each country. One report for each region, and one report globally.

6. Will the reports generated be categorized in different the Type of Reports (categories)? If so, then when the users are created they can be assigned to specific set of reports based on the categories.

Not sure what this means, so I would say no

7. Will the Report Type change frequently? (This is with reference to above question)

If Yes we can keep them dynamic (Flexibility to add/Edit/Delete)

No. we can keep them Static.

8. From the end-user perspective, what type of customization is expected on the reports? (This is with respect to the statement in the RFP “Users must be able to generate customized reports.”)

Users can select which targets are relevant to their country and they want to see on the visualization.

9. Are there any specific visualizations that the client is currently expecting out of the analytical tool? (For example: Specific charts/graphs, or use of geographic maps for data visualization)

The visualization options must be identified during the analysis phase of the project.

10. Kindly request you to please share the sample CSV file for data produced by Ten Targets Tracking Tool.

Please find the sample data attached with the RFP. The data is only a test sample and meant for illustration purpose.
