COUNTRIES HAVE A CLEAR CHOICE FOR THEIR AIDS RESPONSE

Keep things as they are:

NO SCALE-UP—maintain 2013 coverage levels

Without scale-up, the AIDS epidemic will continue to outrun the response, increasing the long-term need for HIV treatment and increasing future costs.

Or take the Fast-Track:

RAPID SCALE-UP—achieve ambitious targets

MAJOR BENEFITS:

21 MILLION
28 MILLION
5.9 MILLION
15-FOURFOLD

New HIV infections in low- and middle-income countries (millions)
AIDS-related deaths in low- and middle-income countries (millions)
New HIV infections in different population groups, low- and middle-income countries, 2030
Rapid scale-up of essential HIV prevention and treatment approaches will enable the response to outpace the epidemic.
