
I am a child living with HIV. I face these issues.

I get sick often,
but my mother
has no money
to pay for the
clinic

My parents both
died of AIDS and
I live with my
grandmother

I am scared
that I will die
because my
baby sister died

Children will not
play with me in
school, because
they know I have
HIV

My HIV medicine
stopped when my
family moved to a
different village

The school does
not teach us about
our bodies or
sexual health

People whisper
that I have
something bad,
but I do not
understand

I have dropped
out of school,
because I am
often sick

I worry about
my mother
because she
gets ill often
