Country progress report - Burundi

Global AIDS Monitoring 2017
Contents

Overall - Fast-track targets

Commitment 1 - Ensure that 30 million people living with HIV have access to treatment through meeting the 90-90-90 targets by 2020

Commitment 2 - Eliminate new HIV infections among children by 2020 while ensuring that 1.6 million children have access to HIV treatment by 2018

Commitment 3 - Ensure access to combination prevention options, including pre-exposure prophylaxis, voluntary medical male circumcision, harm reduction and condoms, to at least 90% of people by 2020, especially young women and adolescent girls in high-prevalence countries and key populations—gay men and other men who have sex with men, transgender people, sex workers and their clients, people who inject drugs and prisoners

Commitment 4 - Eliminate gender inequalities and end all forms of violence and discrimination against women and girls, people living with HIV and key populations by 2020
Commitment 5 - Ensure that 90% of young people have the skills, knowledge and capacity to protect themselves from HIV and have access to sexual and reproductive health services by 2020, in order to reduce the number of new HIV infections among adolescent girls and young women to below 100 000 per year

Commitment 6 - Ensure that 75% of people living with, at risk of and affected by HIV benefit from HIV-sensitive social protection by 2020

Commitment 7 - Ensure that at least 30% of all service delivery is community-led by 2020

Commitment 8 - Ensure that HIV investments increase to US$ 26 billion by 2020, including a quarter for HIV prevention and 6% for social enablers

Commitment 9 - Empower people living with, at risk of and affected by HIV to know their rights and to access justice and legal services to prevent and challenge violations of human rights

Commitment 10 - Commit to taking AIDS out of isolation through people-centered systems to improve universal health coverage, including treatment for tuberculosis, cervical cancer and hepatitis B and C
Overall

Fast-track targets

Progress summary

Les indicateurs VIH progressent bien de façon générale
Commitment 1

Ensure that 30 million people living with HIV have access to treatment through meeting the 90-90-90 targets by 2020

Progress summary

No

What is the recommended CD4 threshold for initiating antiretroviral therapy in adults and adolescents who are asymptomatic, as per MoH guidelines or directive, and what is the implementation status?

TREAT ALL regardless of CD4 count; Implemented countrywide

Does your country have a current national policy on routine viral load testing for monitoring antiretroviral therapy and to what extent is it implemented?

a) For adults and adolescents
Yes, partially implemented

b) For children

Yes, partially implemented

1.1 People living with HIV who know their HIV status, Burundi (2015-2016)

![Graph showing percentage of people living with HIV who know their HIV status at the end of the reporting period]

1.2 People living with HIV on antiretroviral therapy, Burundi (2011-2016)

![Graph showing number of people on antiretroviral therapy at the end of the reporting period]
1.4 People living with HIV who have suppressed viral loads, Burundi (2015-2016)

1.6 Antiretroviral medicine stock-outs, Burundi (2016)
Commitment 2

Eliminate new HIV infections among children by 2020 while ensuring that 1.6 million children have access to HIV treatment by 2018

Progress summary

La tendance montre que en 2020 on aura 134 enfants/an soit un taux de transmission de 2.69%. Pour le Burundi, les PPVIH enfants sont estimes a 5475 en 2018 selon la projection Spectrum 2017

Policy questions

Does your country have a national plan for the elimination of mother-to-child transmission of HIV?

Yes

Target(s) for the mother-to-child transmission rate and year:

Year:

Elimination target(s) (such as the number of cases/population) and Year: 60%

Year: 2016

Do the national guidelines recommend treating all infants and children living with HIV irrespective of symptoms and if so, what is the implementation status of the cut-off?

Treat All

Implemented countrywide
2.1 Early infant diagnosis, Burundi (2011-2016)

Number of infants who received an HIV test within two months of birth during the period.

2.1 Early infant diagnosis, Burundi (2015-2016)

62 (2016)

↑ 1.5 (2015)

Percentage of infants born to women living with HIV receiving a virological test.
2.3 Preventing the mother-to-child transmission of HIV, Burundi (2011-2016)

![Bar chart showing trends in mother-to-child transmission of HIV from 2011 to 2016 in Burundi.](chart1.png)

- Estimated number of women living with HIV who delivered within the past 12 months
- Number of pregnant women living with HIV who delivered and received antiretroviral therapy
- Number of pregnant women living with HIV who received antiretroviral therapy before the current pregnancy

2.2 Preventing the mother-to-child transmission of HIV, Burundi (2015-2016)

![Pie chart showing percentage of pregnant women living with HIV who received antiretroviral therapy.](chart2.png)

- 81% (2016)
- 65.9% (2015)

- Percentage of pregnant women living with HIV who received antiretroviral therapy
Commitment 3

Ensure access to combination prevention options, including pre-exposure prophylaxis, voluntary medical male circumcision, harm reduction and condoms, to at least 90% of people by 2020, especially young women and adolescent girls in high-prevalence countries and key populations—gay men and other men who have sex with men, transgender people, sex workers and their clients, people who inject drugs and prisoners

Progress summary

On espere que avec le Fast Track, tous les autres aspects vont suivre de la meme maniere
