Country progress report - Grenada

Global AIDS Monitoring 2019
Contents

I. Overall - Fast-track targets

II. HIV testing and treatment cascade - Ensure that 30 million people living with HIV have access to treatment through meeting the 90-90-90 targets by 2020

III. Prevention of mother-to-child transmission - Eliminate new HIV infections among children by 2020 while ensuring that 1.6 million children have access to HIV treatment by 2018

IV. HIV prevention; Key populations - Ensure access to combination prevention options, including pre-exposure prophylaxis, voluntary medical male circumcision, harm reduction and condoms, to at least 90% of people by 2020, especially young women and adolescent girls in high-prevalence countries and key populations—gay men and other men who have sex with men, transgender people, sex workers and their clients, people who inject drugs and prisoners

V. Gender; Stigma and discrimination - Eliminate gender inequalities and end all forms of violence and discrimination against women and girls, people living with HIV and key populations by 2020

VI. Community-led service delivery - Ensure that at least 30% of all service delivery is community-led by 2020

VII. AIDS out of isolation - Commit to taking AIDS out of isolation through people-centred systems to improve universal health coverage, including treatment for tuberculosis, cervical cancer and hepatitis B and C
Overall

Fast-track targets

Progress summary

The national HIV response program has been ongoing from 1984. Over these three decades there has been years of advances and other with challenged to these advances. On average the rate of new infections rose consistently until 2015 when that rate started to decline through to 2018. People living with HIV also have increased as AIDS related deaths have similarly shown a decline. The Ministry of Health has made a commitment to continue to resource our National program and to aim to achieve our goal of 90-90-90. The focus for 2019 will be to achieve the first 90 by increasing mechanisms for testing and collaborating with other stakeholders in that bid. Our Civil Society Organisation with responsibility for key population is considered a key partner in this endeavor.

1.7 AIDS mortality per 100,000, Grenada (2016-2018)

Total number of people who have died from AIDS-related causes per 100,000 population
HIV testing and treatment cascade

Ensure that 30 million people living with HIV have access to treatment through meeting the 90-90-90 targets by 2020

Progress summary

Grenada is committed to ensuring that treatment is available for everyone living with HIV. Discussions have begun with regards to the material and supplies needed to commence a treat all approach to our national program. Through our Pooled Procurement Service provided by the OECS, provides a mechanism for the procurement of ARVs at a price that supports our ability to treat all.

1.2 People living with HIV on antiretroviral therapy, Grenada (2011-2018)

Number of people on antiretroviral therapy at the end of the reporting period
1.3 Retention on antiretroviral therapy at 12 months, Grenada (2011-2018)

Percentage of adults and children living with HIV known to be on antiretroviral therapy 12 months after starting

1.5 Late HIV diagnosis, Grenada (2018)

Percentage of people living with HIV with the initial CD4 cell count <200 cells/mm3 during the reporting period
1.7 AIDS mortality rate per 100 000, Grenada (2016-2018)

Total number of people who have died from AIDS-related causes per 100 000 population

1.8 HIV testing volume and positivity, Grenada

Percentage of HIV-positive results returned to people (positivity) in the calendar year

Number of HIV tests conducted = 1,698
Prevention of mother-to-child transmission

Eliminate new HIV infections among children by 2020 while ensuring that 1.6 million children have access to HIV treatment by 2018

Progress summary

Our commitment to treatment for children are same and in accordance with efforts to improve our adolescent health policy, recognizing the gaps that exists with regards access to health care overall.
2.1 Early infant diagnosis, Grenada (2011-2018)

Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth

![Bar Chart]

2.1 Early infant diagnosis, Grenada (2017-2018)

Percentage of infants born to women living with HIV receiving a virological test for HIV within two months of birth

![Pie Chart]

100.0% (2018)

↑ 83.3% (2017)
2.2 Mother-to-child transmission of HIV, Grenada (2011-2018)

Estimated percentage of children newly infected with HIV from mother-to-child transmission among women living with HIV delivering in the past 12 months

2.3 Preventing mother-to-child transmission of HIV, Grenada (2011-2018)

Percentage of pregnant women living with HIV who received antiretroviral medicine to reduce the risk of mother-to-child transmission of HIV
2.4 Syphilis among pregnant women, Grenada (2018)

Percentage of pregnant women tested for syphilis

78.8%

2.4 Syphilis among pregnant women, Grenada (2018)

Percentage of pregnant women tested positive for syphilis

1.1%
2.4 Syphilis among pregnant women, Grenada (2018)

Percentage of pregnant women on treatment among those who tested positive

![Circle chart showing 33.3% of pregnant women on treatment among those who tested positive.]

2.5 Congenital syphilis rate (live births and stillbirth), Grenada (2013-2018)

Percentage of reported congenital syphilis cases (live births and stillbirth)

![Line chart showing the number of congenital syphilis cases from 2013 to 2018.]

Number

2013 2014 2015 2016 2017 2018
HIV prevention; Key populations

Ensure access to combination prevention options, including pre-exposure prophylaxis, voluntary medical male circumcision, harm reduction and condoms, to at least 90% of people by 2020, especially young women and adolescent girls in high-prevalence countries and key populations—gay men and other men who have sex with men, transgender people, sex workers and their clients, people who inject drugs and prisoners

Progress summary

We are working with our strategic partner Civil Society Organisation that advocates for our Key population to build capacity and provide resource to be able to offer access to combination prevention options.
3.2 Estimates of the size of key populations, Grenada

![Bar chart showing estimates of key population sizes in Grenada.](image)

3.3 HIV prevalence among key populations, Grenada (2011-2018)

**Percentage of specific key populations living with HIV**

![Line chart showing HIV prevalence trends.](image)
3.4 HIV testing among key populations, Grenada

Percentage of people of a key population who tested for HIV in the past 12 months, or who know their current HIV status

3.5 Antiretroviral therapy coverage among people living with HIV in key populations, Grenada

Percentage of the people living with HIV in a key population receiving antiretroviral therapy in the past 12 months
3.6 Condom use among key populations, Grenada (2011-2018)

Percentage of people in a key population reporting using a condom the last time they had sexual intercourse

3.15 People who received pre-exposure prophylaxis, Grenada (2017-2018)

Number of people who received oral PrEP at least once during the reporting period
Gender; Stigma and discrimination

Eliminate gender inequalities and end all forms of violence and discrimination against women and girls, people living with HIV and key populations by 2020

Progress summary

In collaboration with the Ministry of Social Development, a protocol for management of Gender violence has been developed.

Percentage of Global AIDS Monitoring indicators with data disaggregated by gender
Community-led service delivery

Ensure that at least 30% of all service delivery is community-led by 2020

Progress summary

Under the just concluded Global Fund Grant, capacity building in the area of testing services with done for community health workers. Similarly, an assessment for the integration of HIV into Primary Health Care was conducted by PAHO. It is hoped that in the coming years we will incrementally decentralize HIV response in the primary health care system.
AIDS out of isolation

Commit to taking AIDS out of isolation through people-centred systems to improve universal health coverage, including treatment for tuberculosis, cervical cancer and hepatitis B and C

10.1 Co-managing TB and HIV treatment, Grenada (2011-2018)

Percentage of estimated HIV-positive incident tuberculosis (TB) cases (new and relapse TB patients) that received treatment for both TB and HIV
10.2 Proportion of people living with HIV newly enrolled in HIV care with active TB disease, Grenada (2015-2018)

Total number of people living with HIV with active TB expressed as a percentage of those who are newly enrolled in HIV care (pre-antiretroviral therapy or antiretroviral therapy) during the reporting period.

10.3 Proportion of people living with HIV newly enrolled in HIV care started on TB preventive therapy, Grenada (2015-2018)

Number of patients started on treatment for latent TB infection, expressed as a percentage of the total number newly enrolled in HIV care during the reporting period.
10.4/10.5 Sexually transmitted infections, Grenada (2013-2018)

Number of men reporting urethral discharge in the past 12 months; number of men reported with laboratory-diagnosed gonorrhoea in the past 12 months

10.6/10.8 Hepatitis testing, Grenada (2015-2018)

Proportion of people starting antiretroviral therapy who were tested for hepatitis
10.7/10.9 HIV and Hepatitis B/C, Grenada (2015-2018)

Proportion of people coinfected with HIV and HBV/HCV receiving treatment

10.10 Cervical cancer screening among women living with HIV, Grenada (2016-2018)

Proportion of women living with HIV 30–49 years old who report being screened for cervical cancer using any of the following methods: visual inspection with acetic acid or vinegar (VIA), Pap smear or human papillomavirus (HPV) test
