

I am a displaced person. I face these issues.

I need to continue my treatment, but the earthquake destroyed the health clinic

> I was raped and received no care

I am worried that my HIV test result will be used to deny my asylum request

> I want condoms, but the health clinic has run out of them

I am young. I need education and skills to lead a better life when I return home

> It is not safe for me to go alone to get firewood

I resort to sex work to meet my basic needs and to care for

my children

Iam discriminated

> against in the local

community

I want to enjoy a decent standard of health

I want to be independent and self-reliant again

I cannot think about I do not know what will happen to me tomorrow

> We lost everything in the war
