

I am a prisoner. I face these issues.

I have to share a needle to inject drugs because they are banned

I was gang raped when I first arrived in prison

There is lots of unprotected sex in prison but nobody cares

There is no methadone so I started injecting drugs again

20 of us are locked in the same cell for hours each day

There are no condoms and lubricants in prison

I sold sex to feed my children. No one looks after them while I am here

I am very sick but I cannot see a doctor

I have been locked up for months without a trial

I am forced to have sex to protect myself from violence

My HIV treatment has stopped since coming to prison

I am worried about my safety

I do not know my rights and I don't have a lawyer
