I am an injecting drug user. I face these issues.

I am treated as a criminal and this makes it hard to take care of my health

Health-care
workers do not
trust me, as if I just
want drugs

I started using drugs when I was young and now I sell sex to get drugs

I cannot get opioid substitution because it is illegal

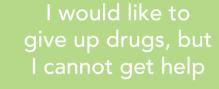

There are no friendly health-care services near where I live

The police arrest us for anything and often extort money or sex in exchange for letting us go

I want a job, a family and some security

I do not have a permanent home

> Without clean needles and syringes, I have to share

I was forced to take a drug test and ended up in compulsory treatment
