

Global AIDS Strategy 2021–2026

A People-Centred HIV Response

ARE LESS LIKELY THAN COLDER DECODER MITH COLDER DECODER ARE LESS LIKELY THAN COLDER DECODER ACCESS CONSTANTS COLDER DECODER ACCESS TREATMENT

CHILDREN ACCOUNTED FOR 5% EPEOPLE DOD IN 2019 AIDS-RELATED DEATHS. MOST OF THOSE DEATHS WERE OF CHILDREN UNDER FOUR YEARS OLD

The change imperative

Even before the COVID-19 pandemic, the AIDS response was off track to reach the 2020 targets. 1.7 million people were newly infected with HIV in 2019 and 690 000 people lost their lives to AIDS-related illnesses.

We are failing on HIV prevention: Every week, 5500 young women and girls aged 15-24 become infected with HIV. In 2019, key populations accounted for 62% of all new infections

Major inequities persist in availability, accessibility and quality of HIV treatment and care services within and between populations and countries.

At the end of 2020, we have not achieved expected results because we are not making progress on addressing the key social and structural enablers.

Gains in the HIV response remain fragile. **90% of countries reported disruption** of essential health services, including HIV services due to COVID-19.

TRANSFORMATIVE HIV RESPONSE

t B

Zero HIV-related Discrimination

- Laws criminalizing HIV transmission or key populations remain in most countries.
- Stigma and discrimination continue to constitute a major barrier to an effective HIV response.
- No country has achieved gender equality. Gender based violence is widespread.

Zero New HIV Infections

- The 1.7 million new infections in 2019 are 3x higher than global target, and most are among key populations.
- Newly infected young women in 2019 nearly 3x higher than global target of less than 100 000 by 2020.
- The 150,000 new infections among children in 2019 are almost 8x higher than the target for 2020

1 Zer Dea

Zero AIDS-related Deaths

- Despite seeing the most progress treatment remains inadequate and fragile.
- AIDS remains one of the leading causes of death for women of reproductive age worldwide and adolescents in Eastern and Southern Africa.
- In 2019 690 000 lives were lost due to AIDS-related illnesses

- Proactively remove barriers in access to services and justice for key populations and people living with HIV.
- > Take actions to remove gender inequality in the HIV response.
- Generate and use evidence with and for communities left behind to close gaps in HIV services.

- Direct investments to the most effective programmes and to populations most at risk.
- Intentionally resource and commit to Community-led responses.
- Comprehensively and effectively integrate HIV and sexual and reproductive health responses

- Prioritise those that are the most marginalised and left behind, even in countries with high treatment coverage.
- Invest in innovations and community- led responses
- Enable resilience in health systems by learning from crises such as Covid-19

The new Global Strategy promise

2025 Targets

Set clear targets for the removal of societal and legal barriers to accessing services.

- < 10% countries have punitive laws and policies
- < 10% experience stigma and discrimination < 10% experience gender inequality and violence

Call for 95% coverage of a core set of evidence-based HIV services.

95% use combination prevention 95% of PLHIV know their status 95% of PLHIV know their status initiate treatment

95% of women access HIV and sexual reproductive health services 95% coverage of services for eliminating vertical transmission 95% on treatment are virally suppressed

Emphasize the importance of integrating the HIV response with efforts to achieve Universal Health Coverage and the SDGs.

90% of people living with HIV and people at risk are linked to people centered and context-specific integrated services

GAME CHANGERS

- Enable all components of and accelerate prevention.
- Prioritise key populations and people left behind
- End inequities and inequalities
- Tailor responses to population and location contexts
- Close the most glaring gaps

Priority 1: Breakdown barriers to achieving HIV and health outcomes

RA 6 Community-led responses RA 7 Human Rights and Justice of PLHIV, people at risk RA 8 Gender-Equality

Vision

Zero AIDS Related Deaths Zero New Infections Zero Discrimination

Priority 3: Strengthen resilient, inclusive and fully resourced HIV and pandemic responses

RA 9 HIV and health services support RA 10 Resources for effective and equitable HIV responses RA 11 Conflict, Natural Disasters, Humanitarian Crises RA 12 Resilient HIV responses (pandemics)

CROSS CUTTING ISSUES

equitable and equal

RA 3 Prevention Young People

RA 4 Prevention Key Population

and solutions

access to HIV services

RA 1 Test, Treat, Care, Viral Suppression

RA 2 Vertical Transmission, Paediatric AIDS

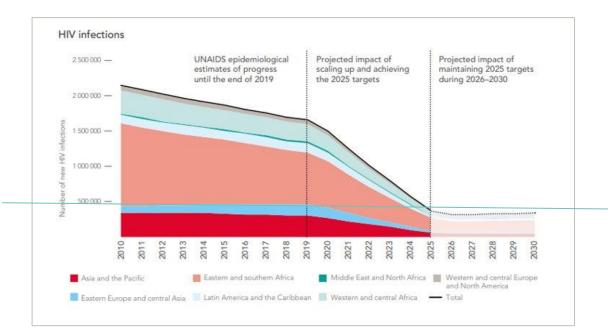

RA 5 Social Protection PLHIV, people at risk

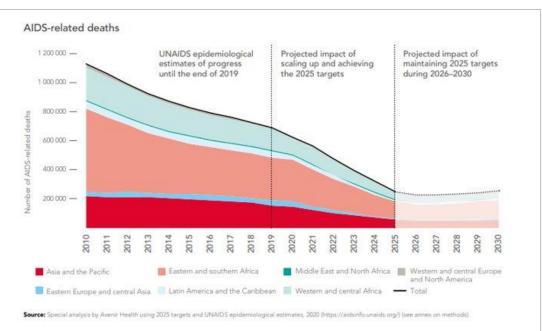

FINANCIAL COMMITMENT, LEADERSHIP AND POLITICAL ACTION, KNOW YOUR EPIDEMIC, MULTISECTORALITY AND PARTNERSHIPS, SCIENCE, RESEARCH AND INNOVATION, INTERSECTION ACROSS HEALTH & DEVELOPMENT RESPONSES

2030 | Ending the AIDS epidemic

Projected impact of reaching the 2025 targets and delivering on the new Strategy

2030 | Ending the AIDS epidemic

Strategy finalisation timeline

| When | What |
|-----------------------|--|
| 16 December | PCB Discussion on Strategy |
| 11 – 20 January | Regional consultations on Strategy and HLM |
| 22 January | Draft Strategy circulated |
| 29 January | Final touchpoint |
| 15 March 2021 | PCB Special Session - PCB adopts the Strategy |
| 15 – 22 March | SG Report - Deadline for Secretariat to submit |
| 26 April – 5 May 2021 | SG report 12 weeks before HLM |
| твс | HLM on AIDS - SG report published 6 weeks before HLM |
