I am a migrant. I face these issues.

I am HIV-positive and I have no access to treatment

> I have no access to HIV-related information

Away from my family I visit sex workers but no condoms are available

I am unable to find a doctor who understands me

I do not understand the language spoken where I now live

I was forced to leave my country because of my sexual orientation

I need to send all my earnings home to my family My employer took away my passport and forces me to have sex

Who is looking after my family while I am gone?

I fear being deported if I test positive for HIV I do not know what my rights are here

My new neighbours do not like foreigners
